an adjunct to digestion as is the mastication | be practically inexhaustible. of solid food preparatory to swallowing it. Redeeming Bank Notes. It is obvious, however, that there is a limit to the amount of fluid one can swallow Many an interesting story might be told pot them off by themselves; but do not with impunity—not to speak of comfort— of the manner in which bank notes are make the mistake of putting them in pot just as much with meals as at other times."
It would be dangerous to create a general impression that fluid is good with food irrespective of quantity. It is moreover.

Sometimes men which bank notes are that are too large. At first the roots will be few and delicate, and therefore not in condition to make use of the large amount able form. Sometimes men will hide their impression that fluid is good with food irrespective of quantity. It is, moreover, a well ascertained clinical fact that an excess of cumprandial fluid does retard digestion in some people, and gives rise to discomfort in most. A little attention to one's sensations in such matters will far better fix the desirable limit than all the limit of the whereabouts of the treasure, will build up a fire that heats the treasure.

right that she should do her share towards Bad Eggs. conveying an idea of the colossal nature of the exposition. Reference was made a few days ago to the mammoth cheese which Canada will exhibit at Chicago next year, Canada will exhibit at Chicago next year, and some further particulars in reference to this gigantic specimen of our dairy products are now given. The cheese was made at the Dominion experiment dairy station at Perth under direction of Prof. Robertson, dairy commissioner, and will certainly rank as the mammoth cheese of the world. It weighs over 22,000 pounds and contains the curd of a day's milk from 10,000 cows. A gigantic caken press was erected for the purpose of constructing the cheese and 200 tons of pressure was applied. The mould or hoop is made of steel boiler plate, five sixteenths of an inch thick. The cheese will be turned upside down twice a week until perfectly cured, and already it has been pronounced perfect in texture, and color. The plans and preparations for and color. The plans and preparations for the total carried and color. The plans and preparations for the total carried and color. The plans and preparations for the total carried and color. Use Common Sense.

Use Common Sense.

Whow To FEED AND HOW TO WATER A HORSE.

A horse can live twenty-five days without solid food, merely drinking water; seventeen days without drinking. An idea prevails among horsemen that a horse should never be watered oftener than three times a day, or in twenty-four hours. This is not only a mistaken idea, but a brutal practice, says the Buffalo Horse World. A horse's stommon carried the polar to the polar the polar to the polar the polar to the polar than the paper men are used to the theather workers to obtain them in sufficiently large quantities. Twelve years ago the workers in morocco and kid were compelled to break the eggs them so the in sufficiently large quantities. Boston Baked Beans.—Pick over one quart of pea beans and wash thoroughly and soak over night. In the morning boil until the inside skin will crack when blown upon, then place in the beanpot with a quarter of a pound of nice pork, fat and lean, mixed, add a tablespoonful of molasses, a tablespoonful of salt and a teaspoonful of mustard. Fill the pot with boiling water and place in the oven and bake until done. From time to time fill the pot with boiling water to keep the beans from becoming pasty.

Came in relieving Jim, or Jim came to relieve John. The question will not be definitely decided until Mr. Schaefer and Mr. Wheaton meet in the Olympic ring. Just on the stroke of that eventful 6 o'clock Mr. Wheaton was going off duty. He stepped to the door and called "Jim." The brothers were standing close together, and each looked at the other. "Jim," again thundered the big clerk. Each boy then punched the other, but otherwise neither stirred. Mr. Wheaton changed his tactics, and yelled "John." The clerk became exapperated. "It John don't come here this Pig's Head Cheese.—Boil a pig's head asperated. "It John don't come here this minute I'll have him discharged."

Both boys came at a trot. "Why, this one," said Mr. Wheaton; "No it ain't," said Schaefer; "that's

If there is any danger of its not keeping, But during the discussion the boys had times. When the clerks were informed of et this on the fire and let it come to a happy and said they didn't give a rap which

"Same as I did last year, I guess. I suppose I'll put in two weeks trying to bor-

v enough money to go away for two or ree days. PRECAUTION. - Vat you do, Ikie? Ikie-Der man shtoldt ter coat and I'm oin' ter shoot him. Jakie-Mein gracious! Shoot him in der eg; don't shpoil der coat.

Doctor-"Did you have a heavy chill?" Fair Patient--"It seemed so." Doctor-Did your teeth chatter?" bair Patient-'No they were in my dressing-case." -"First Steps in Electricity" is the title of a recent book. Stepping on a live

wire is one of the "last steps" isn't it?
