when used as a garden plot. interest on the money for this prop- Bridgetown, erty, and we take it for granted that if a few can carry on business as above, a few can carry out the pro posed idea in reference to feeding

Along with the foregoing proposal came another viz., that the Women's Institute and Community send one of the older school girls to Truro to partake in a three weeks course in mestic Science. We ask in this connection as to who would be held sponsible should this party fail in the Provincial Exams as a result of the loss of three weeks of study at heir Home School. Again, if thi is the only way that the rising generation is going to learn to be diet-itians it is going to take a long while to get them all prepared for their work in life. It would be just as fair to ask the Community to send a boy to the Short Course at Trure in order that he might learn in two

With all fairness to the school children we admit that it is some dren to go a long ways four times a day through all sorts of weather or to eat a cold dinner at the school house, but how many generations have done this very thing, and yet we find that people have lived as long and enjoyed as good health as any of us can ever expect to. Giv all children go Home for a hot dinner will be a far better solution than to go to all this unnecessary work, We thank you Mr. Editor for this

russ can be carried out advantage ously and without triction, but sometimes things look better on the surtace than they do when examined deeper and more thoroughly. Thus these few statements are penned by some who dwelt upon the proceedings in view, with deeper thoughts than have been used by those who are attempting to promulgate them.

It has been proposed by a few individuals in this Town, that during the winter months the school building be transformed into one of a Domestic Science nature, whereby the children might cook their own dinters, and enjoy the same while warm.

The materials used during this pro

Often some slight trouble will cause a general upset of the system. Such symptoms as nervousness, painful times, irregularity, backache and headache indicate some form of female weakness.

Ready to Roll the

shop is perhaps the most un-resting institution one could pos-y think of. It suggests to one's imate dry grimy. Even the surrounding these stolid premoks forbidding, like a prison during the mind everything that is cold and

wall.

But during the great Canadian grain rush from West to East there are few places in the West more interesting than the West on Shops of the Canadian Pacific Railway, at Winnipeg, where 500 cars a day are smatched in off the main line, repaired and shot out the next day to resume their place in the big rolling movement of the world's grain caravan.

This institution, quietly situated on the western outskirts of Winnipeg, ranks among the big industrial organizations of the West. It employs eighteen hundred men the year round, and has a monthly payroll of \$220,000. Weston Shops, which last year repaired 39,518 cars, 200 coaches and 494 engines—and manufactured a million and a half dollars' worth of material—gives one the impression of being a big, self-contained corporation, instead of a minor part of a big railroad system.

Under Works Manager H. B. Bowen, there are \$15 men working
