

Spraying Pays

This has been fully demonstrated to the farmers and fruit growers of Ontario during the past three years.

Messrs. H. J. Scripture & Son, Brighton, Ont., under date of Dec. 12th, 1911, write as follows:—

MESSRS. NIAGARA BRAND SPRAY CO., LIMITED,
Burlington, Ont.

Dear Sirs:

You will probably be interested to learn the results of our spraying this year with "Niagara Lime-Sulphur and Arsenate of Lead."

Our Greenings ran 95-96 % No. 1, Baldwins, 97 % No. 1, Gano, 99½ % No. 1. and we expect the Ben Davis will be 100 % No. 1. This we consider fairly good. The packers are willing to make sworn statements to these figures.

We think that a large measure of our success was due to our high pressure spraying. The third spray was put on from 250 to 300 lbs. pressure with our Challenge outfit, which gave us perfect satisfaction again this year, and you know we used it considerably as we used the 17 barrels of Lime-Sulphur we purchased from you.

The syphon tank filler was a success too and saved a great deal of time, and time at the spraying season is considerable money.

Should you wish any further figures or any recommendation for your goods we should be only too pleased to give them.

Yours very truly, H. J. SCRIPTURE & SON.

This is only one of hundreds of testimonials we receive.

Such Fruit Growing has been made possible only by the use of

Niagara Lime - Sulphur and Arsenate of Lead and Spray Pumps that have Power

NIAGARA is the only absolutely reliable Spray.

There is a Reason Why: It is made right and stays right.

It carries the highest analysis. It always gives results.
