

“The consequence of these studies is the discovery of the duplication and division of several glands, and of organs that anatomy and the scalpel alone had not revealed to us and could not possibly have discovered. M. Kowalevsky has thus revealed to us scattered groups of cells, or even isolated cells, that represent the most complete organs.

“Thus, by this method he has just sought for the lymphatic glands of myriapods, and has found them scattered about in the form of groups of cells, or of isolated cells on the sides of the body or elsewhere, where they had never hitherto been recognized.”—*The Literary Digest*.

NECESSITY OF FREQUENT VISITS.—The Supreme Court of California (*Todd vs. Myers*, 40 Cal., 355), in an action brought by a physician for professional services—the defence being that the visits were too frequent and not necessary—rules that “The defendant having admitted the employment of the plaintiff as a physician to treat his wife and children, the plaintiff was the proper judge of the necessity of frequent visits, and, in the absence of proof to the contrary, the Court will presume that all the professional visits made were deemed necessary and were properly made. It would be a dangerous doctrine for the sick to require a physician to be able to prove the necessity of each visit before he can recover for his services. This is necessarily a matter of judgment, and one concerning which no one save the attending physician can decide. It depends not only upon the condition of the patient, but in some degree upon the course of treatment adopted.”—*Medicine*.

TREATMENT IN ACUTE AND CHRONIC CYSTITIS.—*Acute Cystitis*—Resulting from gonorrhoea and presenting symptoms of distress and pain over pubes, frequent and urgent inclination to micturate, urine cloudy and depositing slight amount of mucus on standing. *Chronic Cystitis*—Resulting from enlarged prostatic, retained or altered urine, or from gout or nervous derangement—mucus or muco-pus rendering the urine more or less cloudy or opaque. *Treatment*—In addition to the mechanical treatment, usually essential in the management of disorders of this class, the administration of Lambert’s “Lithiated Hydrangea” is often of the greatest service. A practitioner of wide experience says: “I have used Lambert’s ‘Lithiated Hydrangea’ on various persons affected with diverse and painful manifestations of chronic rheumatism, gout, lithiasis-urica, nephritic calculus and functional disturbances of the renal system, with excellent results, and I
