Dear Sir:

While reading in the Youngstown Telegram paper, I saw you were looking for some one who can cure the "cancer". I, can cure the cancer, for I have already had one myself and I cured it. It takes five different kinds of herbs to make the medicine that cures it. The medicine is to be made fresh every day. The medicine is not to eat and is not poisonous, but, should anyone do so, it would not harm them. Some people say to using mud baths. The bath would not cure. It would probably take the poison out, but, it would not take the roots. This medicine is different it takes roots and all. And it cures in a short time. If you would like better information, and some of the medicine, write back to me.
