

4. *How many parts of Alcohol do such liquors ordinarily contain?*

They ordinarily contain, particularly the last mentioned, 45 parts of Alcohol to 55 parts of water and other substances, whatever they may be, which give taste, colour, and smell, especially to gin, to whisky and brandy.

5. *What are those other substances which enter into the composition of such liquors?*

They are water, sugar and the colouring matter. These substances are harmless.

6. *Are there any other dangerous ingredients in liquor?*

Yes, there are such as acids and essences of a poisonous nature.

7. *Are all liquors equally injurious?*

All strong liquors, whatever may be the shape and price of the bottle, contain more or less powerful doses of Alcohol and poisons of great virulence, which make them equally per-
