## THE "A B C" DRY KILNS

Simplicity and Economy of Operation.  
Perfection of Product.

The Fred Macey Company, Grand Rapids, Mich., write:

"We have had ample opportunity to test the six 'Moist Air' Dry Kilns which you installed in our plant, and we find them to be entirely satisfactory. Our superintendent reports that they require very little attention, are economical and easily regulated, and the lumber comes out of the kiln in perfect condition to make high grade goods. We might add that our superintendent has had at least thirty years' experience in kilning lumber and he says these are the best he has had the pleasure of operating."
