

The Wm. Hamilton Mfg. Co., Limited

Builders of a Complete Line of

SAW MILL MACHINERY

We show herewith Our No. 1 Iron Frame Gang, a machine which is probably giving better satisfaction than any other gang on the market.

It is very extensively used—the largest mills in Canada have it, from the Atlantic to the Pacific Coast.

It has one of the most improved styles of oscillating motion in use.

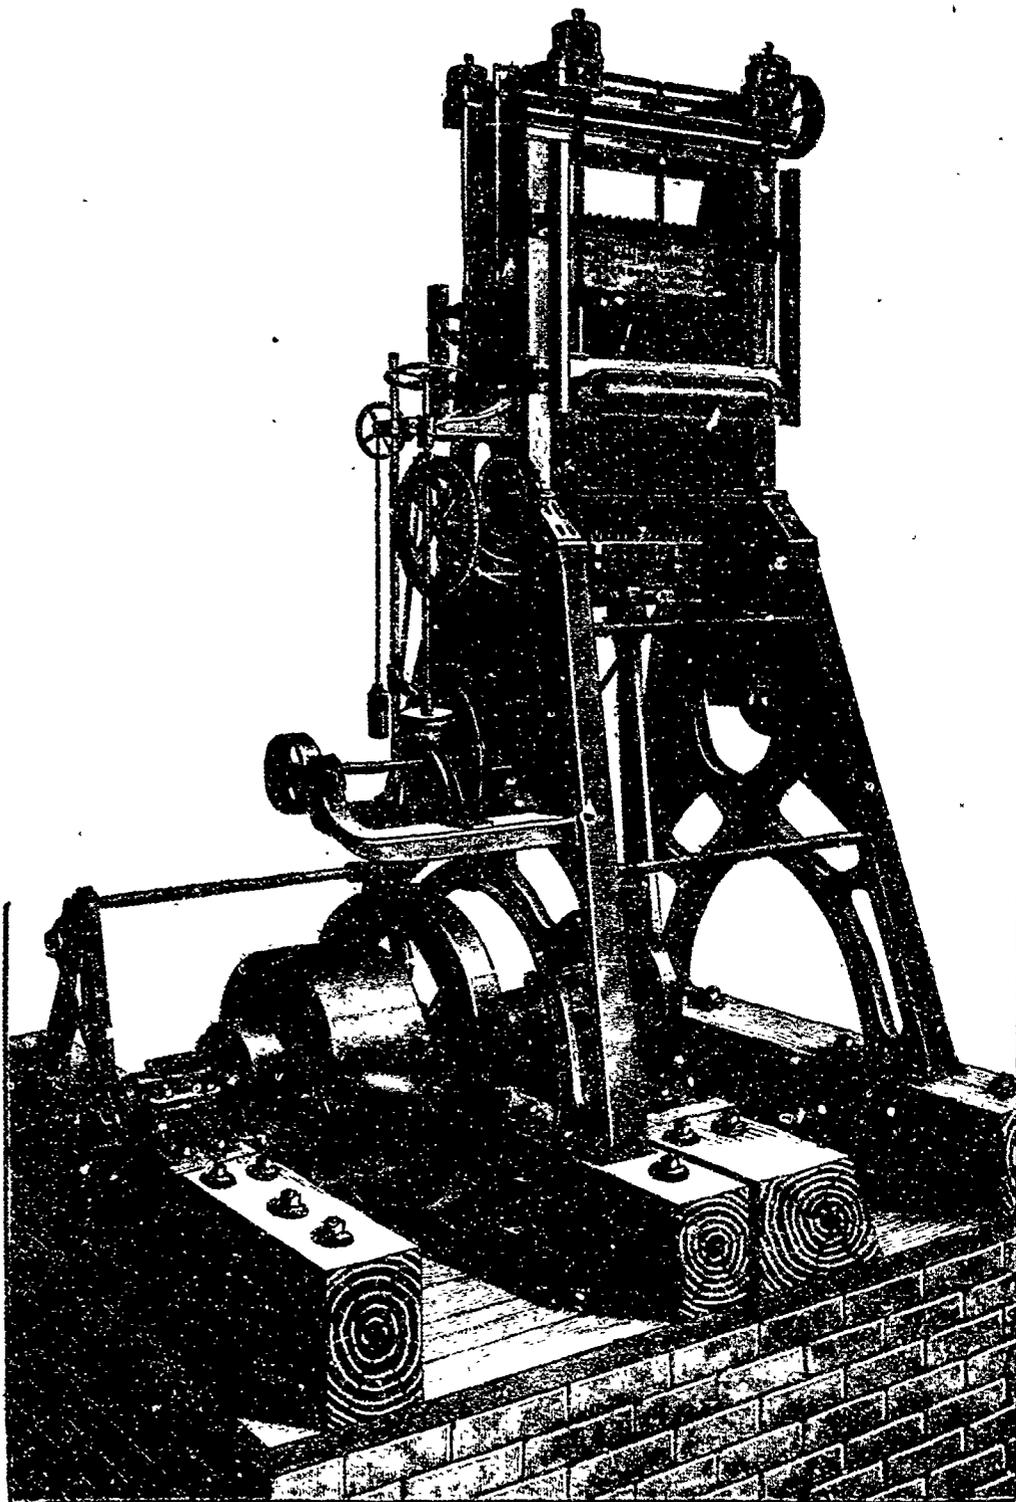

The press rolls are operated by power, and it possesses all the good features of the best American gangs, with heavier frame work, and heavier shaft, with the result that it works rapidly, steadily and correctly.

For uneven cants we can furnish a Divided Binding Roll.

One of these machines with 54 inch sash has a capacity of 100,000 feet of one-inch lumber per day of eleven hours.

We would like to have an inquiry from you as to its many merits.

When you write do not forget that we manufacture everything for a saw mill.
