Studebakers for London

When the London, Ontario, Fire and Police Departments wanted motor car equipment that could be counted upon for plenty of power and motoring efficiency, but economical in operation, they chose Studebaker cars.

They made an exhaustive investigation of the leading makes of American and Canadian cars. Their selection of Studebaker - the foremost Made-in-Canada car - came only after a comparative test of the relative merits of each make.

The Studebaker is economical in operation, due to its splendid quality, reducing maintenance costs to a minimum. In ratio to power the Studebaker is one of the most economical cars on the market in its consumption of gasoline.

If economy, as well as power, is a consideration with you, too, follow the example of the London officials and thousands of other motorwise buyers.

Let us show you the Studebaker's splendid power and easy-riding comfort. "Made-in-Canada" 40 H.-P. FOUR \$1375

Dr. Howard James, late of the Manhattan State Hospital of New York, and formerly Assistant Physician Brooklyn State Hospital, says:

"Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak, pale and sickly-looking, just like a plant trying to grow in a soil deficient in Iron. A patient of mine remarked to me (after having been on a six weeks' course of Nuxated Iron), "Say, Decter, that there stuff is like magic."

"If you are not strong or well you owe."

"If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of nurated iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. From mi Que experience with Nurated remedy that it should be kept in every hospital and prescribed by every physician in this country."
