FROM NEW YORK BY AEROPLANE

*Capt. McCrae, in First International Aerial Express, Brings Plans That
Mark a New Step Forward for Ideal Bread.*

FRIDAY last, Bishop-Barker Aero-
planes, Limited, inaugurated the
first international aerial express
service between New York and
Toronto.

It was fitting that so historic an
event should be associated with
another landmark in the world of
progress.

Amongst the parcels carried by
this novel express service were plans
of the most modern bread-baking
machine in the world, which is to be
erected in the plant of the Ideal
Bread Company.

Once again Ideal Bread Co. takes
the lead in adopting the newest, most
up-to-date equipment devised by
science. This gas-fired travelling oven

will be the first of its type in Canada
—the second in North America.

Think what a revolution that
change will mean in a bakery! The
clean, sanitary, spotless conditions—
free from dust and smoke—which are
essential to absolute purity and
wholesomeness—are now achieved
in fullest measure!

Toronto should be proud of this
bakery—the finest and largest in Can-
ada—a bakery which for up-to-date
equipment is surpassed nowhere on
this continent.
