Disinfection of the Liver. The liver is much more frequently the seat of disease than is generally supposed. The functions it is designed to perform, and in the regular execution of which depends not only the general health of the body, but the powers of the stomach, bowels, brain, and the whole nervous system, shows its vast and vital importance to human health. When the liver is seriously diseased, it in fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operations, which cannot be easily described. It has no close connection with other diseases, and manifests itself by so great a variety of symptoms of a most doubtful character, that it misleads many Physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion we are permitted to exercise over the passions of mankind, convinces us that many unfortunate beings have committed acts of deep and criminal atrocity, or become what is termed Epithymiacs, from the simple fact of a diseased state of the Liver. We have long been convinced that more than one-half of the complaints which occur in this country are to be considered as having their seat in diseased state of the Liver. We will enumerate some of these: INDIGNATION, STOPPAGE OF THE MENSTRU, DERANGED STATE OF THE BOWELS, IRRITABLE AND VIBRANT FEELINGS AND PASSIONS from trifling and inordinate causes, of which we afterwards feel ashamed; last though not least, more than three-fourths of the disease enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue. WILSON'S TONIC & SASSAPARILLIAN, BELIEVED as a remedy for Liver and Bilious Complaints has no equal. The great success which has attended its use will convince the most incredulous. It has been the property of this Elixir should be fairly and fully tested, and that the result has been in every respect favorable, numbers of witnesses can testify.
