THE GROCERY MARKET

The following comment on the market situation as regards food stuffs appeared in Canadian Grocer last week—
The opinion is quite generally held among wholesalers and others closely in touch with the grocery trade that the entry of the United States into the war will mean higher prices in many lines of commodities. Purchase of large stocks of supplies by the United States government for the use of her troops would have the effect of sending prices in an upward direction. Beans and dried fruits of all kinds will be in big demand for the use of troops. Flour and cereals of all kinds, together with sugar, are commodities that adapt themselves to rations for an army and the consumption is expected to be heavier in these.

In the Canadian markets there has been an upward tendency in numerous grocery lines during the week. Eggs are higher and meats are in firm market. Teas have advanced in Canadian markets and still higher prices are looked for. Some authorities on the tea market anticipate that tea will be enhanced in value by fifty per cent. in the near future. Starches and corn syrups are all higher. Cornflakes, gelatine, ketchup, Manila paper, soaps, herring, corn products, are some of the commodities in which there have been advances. Rice will in all probability be in acute market in the near future, as one of the large importing concerns has already repudiated 15 per cent. of its contracts. Due to the fact that the British government has requisitioned tonnage on the Pacific Ocean. Business in grocery lines has kept remarkably good.

THE LUMBER MARKET

Boston, April 10.—For dimension spruce the base price today is \$36. Orders, although not very many, are nevertheless sufficiently numerous to keep moving the saws of the mills at present in operation and some observers are doubtful about the top price having yet been reached.
Whether it will prove practicable to hold the market up to its present level after the production shows the increase usual in the spring, is a question which many people would like to answer. Some of the more conservative manufacturers think that there may be a decline, but that it will not be drastic. Others declare they look for a firm market throughout the year.
Among the retailers there are several whose actions indicate that they lack faith in the permanence of the current price. They are not only buying very sparingly, but, if rumor is correct, they are sometimes selling at figures that seem to prove that they expect to replace the lumber at appreciably less than today's wholesale quotations.
The fact that the nation is now at war may have an untoward influence on the demand. It is conceivable at any rate that people who had intended to build this year may deem that a new house is a luxury without which they can do very well until it becomes clearer just what effect upon their general expenditure war hostilities may have. War may

BIG YEAR FOR HALIFAX.

At the quarterly meeting of the Halifax board of trade, held last week, H. R. Silver, acting president, stated that building permits issued by the City Hall from January 1st to the close of March, totalled \$117,065, compared with \$45,792 for the same period last year. Bank clearings for the same period in 1917 amounted to \$38,334,266, compared with \$29,540,775 for 1916. He also stated that on account of Halifax having been made a port of call for the ocean trade, the tonnage had been greatly increased—the total for the three months ending March 31st, 1917, amounting to 1,237,477 tons, including coastwise steamers and sailing vessels) compared with 561,953 tons for the same period last year.

OUR NEW ALLY.

"Halifax Herald:—Our latest ally, the Republic of Cuba, is to develop still further her business with Canada and it is announced from a reliable source that Caesar A. Barranco, now Cuban consul at St. John, N. B., is to be promoted to the office of consul general for Canada, with headquarters at Halifax. Major Perez Stable, Cuban consul here for several years, recently was called to Havana. His place is being filled by Consul Patterson, formerly Cuban consul at Sweden. Both gentlemen are enthusiastic about the possibilities of increased business between Cuba and Canada and have possessed themselves of much valuable information for their government. Major Stable, on leaving Halifax, said that hereafter Canada would see more of wealthy Cubans and that during the coming summer we would be visited by scores who formerly spent a few months each year in Europe.

GERMAN DRUGS.

F. A. Hocking, of the London Hospital, speaking at the Society of Arts, said that of eighty vegetable drugs used at the London Hospital, few were produced in the Central Empires. Those imported from Germany—such as aconite, belladonna, valerian, and so forth—could be obtained elsewhere, and some of them had always grown in England. Our dependence on Germany was for "synthetic" such as antipyrin, novocain, phenacetin, resorcin, aspirin, and similar drugs, but these were now being manufactured in large quantities in England.

THE HARDWARE MARKETS

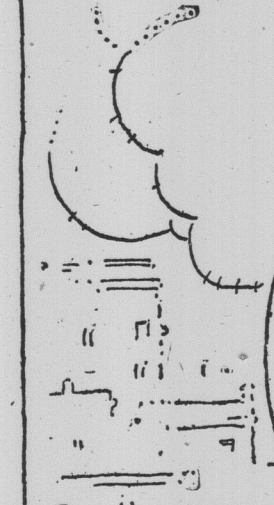

"Hardware and Metal," April 7, said: The entrance of the United States into the war on the side of the allies brings with it a wide scope of market possibilities. The future is very uncertain, owing to the lack of definite statements by the United States as to probable requirements. It is known that of late many United States munitions plants have completed their contracts and did not receive renewals. However, the entrance of the United States government as a heavy buyer of iron and steel products, has already had a firming effect in a market that is already oversold. In the market reports this week there are several important price changes to announce. These changes, all in an upward direction, were anticipated for some time before President Wilson's momentous announcement and the new development in the international situation can hardly be blamed for this week's price advances. Practically all wire products, including wire nails, O & A wire, tinned and coppered wire, wire bale ties, bright and annealed wire. Black and galvanized iron pipe have advanced twice since last week's reports. Prices on pig-iron have been withdrawn this week, and higher prices are undoubtedly forthcoming. Among other lines which have advanced during the week are files, cutlery, chain seats, ice cream freezers, food choppers, screen doors, bit braces, drills, stoves and ranges, black bristle brushes, brooms, coarse jute twine. Turpentine has declined in price and linseed oil is slightly easier, owing to arrivals of flax seed from the west.

Sleeves Up for Shoes

John Kent, president of the American National Shoe Manufacturers' Association, says: "A letter received in Boston by a son of a German shoe manufacturer, whose factory was taken over by the government, and has been making army shoes since the war started, states that the German people are cutting off the sleeves of old garments, tying up one end, and using them for footprotection in place of shoes."
