JOB-PRINTING

"ADVANCE" Building, Chatham, MIRAMICHI

Having completed the removal of the ADVANCE establishment to the old Methodist Church building, corner Duke and Cunard Streets, we are now prepared to execute all kinds of

BOOK AND JOB-PRINTING

in first class style. This establishment was the only one in the Province in a position to enter into competition with the city offices at the

Dominion Centennial Exhibition

at St. John, where it received a MEDAL AND DIPLOMA—

for "Book and Job Printing" and "Letter-Press Printing." This is good evidence of the fine character of its work.

We have also, constantly on sale a large line of blank-forms, such as—

RAILWAY SHIPPING RECEIPTS. (FISH INVOICES, NEWEST FORM.) MAGISTRATE'S BLANKS. DEEDS AND MORTGAGES. SUPREME AND COUNTY COURT BLANKS. SHERIFFS' BLANKS. TEACHERS' AGREEMENTS. SCHOOL ASSESSMENT FORMS. ETC., ETC., ETC.

Send along your orders. D. G. SMITH, Chatham N. B.

General Business.

AN ADVANCE SHEET.

Many years ago I lived for some time in the neighborhood of a private lunatic asylum, kept by my old fellow-student, Dr. Warden, and, having always been disposed to specialize in the subject of mental disease, I often availed myself of his permission to visit and study the various cases placed under his charge.

In one among these, that of a patient whom I will call John Lynn, I came to feel a peculiar interest, apart from scientific considerations. He was a young man of about twenty-five, handsome, gentleman-like, and to a superficial observer apparently quite free from any symptoms of his malady.

His intellectual powers were far above the average, and had been highly trained; in fact, the strain of preparing for a brilliantly successful university examination had proved the cause of a brain fever, followed by a long period of depression, culminating in more than one detached attempt at suicide, which had made it necessary to place him under surveillance.

When I first met him he had spent six months at Greytown House, and was, in Dr. Warden's opinion, making satisfactory progress towards complete recovery. His mind seemed to be gradually regaining its balance, and his cheerfulness and elasticity, and the only unfavorable feature in his case was his strong taste for abstract metaphysical studies, which he could not be prevented from occasionally indulging in.

But a spell of Keat and Hartmann, Goethe and Haman, and Co., was so invariably followed by a more or less retrograde period of excitement and dejection, that Dr. Warden and I devoted no small ingenuity to the invention of expedients for diverting his thoughts from these pernicious volumes, and our efforts were not unfrequently rewarded with success.

My acquaintance with him was several months old, when, one fine midsummer day, I called at Greytown House after an unusually long absence of a week or more. The main object of my visit was to borrow a book from John Lynn, and, accordingly, after a short conversation with Dr. Warden, I asked whether I could see him. "Oh, certainly," said the doctor; "I'm afraid, though, that you won't find him over-bourishing. He's been a little out of his mind since last Monday, and you know that always means mischief with him. To-day, however, he has apparently taken to Berkeley and Herbert Spencer, which is a degree better, and he was talking about you at luncheon, which I thought rather a good sign; so perhaps he may come round this time without much trouble."

Having reached John Lynn's apartments, however, I did not feel disposed to adopt the doctor's hopeful view. For though he appeared outwardly composed and collected—epithets which, indeed, always sound a warning note—there was a certain morbidness in his tone, and a repressed enthusiasm in his countenance, which I judged not to be good. Moreover, I found it quite impossible to steer our conversation out of the channel in which his thoughts were setting; and this was the atomic theory. I did my best for some time, but to no purpose. The atoms and molecules drifted into everything, through the most improbable crevices, like the dust of an Australian whirlwind. They got into sport and politics, and the current phrase of parochial gossip—which really had not the remotest connection with any scientific subject—and the latest novel of the season, albeit the time of the modern metaphysical romance was not yet. So at length, abandoning the bootless struggle, I resolved to let him say his say, and the consequence was that for some half-an-hour's discourse, which I will not attempt to restate, I found myself completely assenting to the propositions of the infinite of the material universe, and the aggregation and vibration of innumerable homogeneous atoms as the origin of all things, from matter to emotion, from the fumble brick to the poet's dream of the unknown.

"Now, what has always struck me as strange," quoth John Lynn, who at this point leaned forward towards me, and held me with a glittering eye, which is to the professional student of his mind and contents suggested the exhibition of sedatives—"what strikes me as strange is the manner in which scientists practically ignore an exceedingly important implication of the theory—one, two, that has been pointed out very distinctly by Leaverton, and not go further back. I refer to the fact that such a limitless atomic universe necessarily involves, in conformity with the laws of permutations and combinations, the existence, the simultaneous existence, of innumerable solar systems absolutely similar to our own, each repeating it in every detail, from the willow-leaves in the sun to the petals on that geranium-plant in the window, whilst in each of them the progress of events has been identically the same. From the condensation of gaseous nebulae down to the pines on 'Change in London at noon to-day. A minute's rational reflection shows that the admission is inevitable. For, grant that the requisite combination doesn't occur more than once in a tract of a billion trillion quinquillions of square miles, what's that, say, or that squared and cubed, to wit with infinite space to draw upon? You'll not overtake the winnowed javelin. But, of course, this isn't all. For it follows from the same considerations that we must recognize the present existence, not only of innumerable billions of earths exactly contemporaneous with our own, and consequently arrived at exactly its stage of development, but also of as many more, older and younger, now exhibiting each successive state, past and future, through which our earth is already passing, or is destined to arrive. For example, there are some still in the paleolithic period, and others where our Aryan ancestors are driving their cattle westward over the Asiatic steppes. The battle of Marathon's going on with one of our Shakespeare's writing Hamlet's 'Is life

Children Cry for Pitcher's Castoria.

Good News!

No one who is willing to adopt the right course, need be long afflicted with boils, eruptions, pimples, or other cutaneous eruptions. These are the results of Nature's efforts to expel poisons and effect a cure.

It is my belief that no other blood-purifier can compare with Ayer's Sarsaparilla.

Fredom

from the tyranny of degraded blood by the use of this medicine.

"For nine years I was afflicted with a skin disease that did not yield to any remedy until a friend advised me to try Ayer's Sarsaparilla. With the use of this medicine the complaint disappeared. It is my belief that no other blood-purifier can compare with Ayer's Sarsaparilla."

"My face, for years, was covered with pimples and humors, for which I could find no remedy until I began to use Ayer's Sarsaparilla. Three bottles of this great blood medicine effected a thorough cure. I confidently recommend it to all suffering from similar troubles."—M. Parker, Concord, Vt.

Ayer's Sarsaparilla,

Prepared by DR. J. C. AYER & CO., Lowell, Mass. Sold by Druggists, \$1.00 per Bottle.
