WESTERN WHEAT CROP PROMISES TO BE AWAY AHEAD OF LAST YEAR

Acreage Under Crop is Twenty Per Cent. Greater—Increase Due to Great Influx of Settlers—Great Rush from Western States Expected This Year

OTTAWA, Ont., April 11 Official reports received by the immigration department from agents throughout Manitoba, Saskatchewan and Alberta show that the total acreage under crop in the Canadian west this year will be about twenty per cent. greater than last year, with all the indications so far pointing to a record yield. The ingreased acreage is trributed largely to the great influx of new settlers during the past year. Reports from agents of the department in the States indicate that the arrivals of American settlers to take up iand will be this year very largely in excess of the number of immigration from Great Britain and other European countries consequent upon the restrictive regulations recently put into force by the department in respect to requiring each immigrant to have in his possession on landing a minimum of \$25, failing friends to look after him or a definite promise of employment, and in respect to the limiting of the number of immigrants sent out by charitable organizations in Great Britain during March was fifty per this heading, please mention The Star.
