C181592

- (vi) Interim Arty Tractor - Reliability and performance trials were discontinued while an air-portable GS body was fitted to the No 1 pilot model. Early damage to the cross sills caused further delays in the trials. New mounting arrangements are being installed after which trials will be continued. Comparison trials with the US 2½-ton 6 x 2 should commence shortly.

(i) Blocked driver for (a) space - concept of the re-design of certain components on the tractor

(ii) Blocked driver for (a) space - concept of the re-design of certain components on the tractor
