

# The SCAUP

common names of this duck and as there are two species identified by the prefix "Big" or "Little" by sportsmen who

to the northern portion of both the old and new worlds during range.

of this duck should all be carefully verified, those for erroneous and refer to the smaller species. The winter continent to the south. On the prairies, the Scaup shares its smaller relative and the Ringnecked Duck, here it is in the Great Lakes of the East and on all fresh water, but caution to be at its best.

Pacific the Scaup is not reckoned as a game-duck, as a large; enormous numbers winter on every bay and as no counted at close range.

and to North America, breeding as far south as Colorado and Mexican border south to the West Indies and Central America.

et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.
