

## WORMS EXPELLED.

Many are inclined to think that if a child has "only the worms" it isn't very serious, but it must not be forgotten that these parasites undermine the health, sap the vitality, make the child thin and puny, and in some cases bring on convulsions and death. If you notice your child grinding the teeth during sleep, picking the nose, eating ravenously but not seeming to gain in flesh, abdomen distended, you may be almost positive worms are present. You should go to your druggist at once and procure a bottle of

## DR. LOW'S WORM SYRUP,

which will positively destroy and expel all kinds of worms.

It is a most pleasant medicine to take, and one that the child will never refuse. As it contains its own purgative there is no need of giving doses of castor oil or calomel afterwards, as is the case with some worm remedies.

### Would Grit His Teeth.

My baby suffered terribly with worms, so bad that he would lie and grit his teeth while he was asleep. I used one bottle of Dr. Low's Worm Syrup, which accomplished the purpose for which it was intended and completely cured him, and now he sleeps quiet and sound, and I can safely recommend Dr. Low's Worm Syrup to any mothers whose children suffer from worms."

### Low's the Best.

We have used Dr. Low's Worm Syrup and find it to be better than any other remedy for a similar purpose. We have tried a good many worm medicines, but during the past five years have stuck to Low's Worm Syrup and proved it to be the best.
