

\$295 Converts Your Ford into a Guaranteed Powerful Staude Mak-a-Tractor

Drive It 24 Hours a Day If You Need It; It Will Always Do the Work

The Staude Mak-a-Tractor is the most economical, most efficient, most remarkable farm implement you can buy. It gives you four horse working ability at one horse cost, and it costs nothing when it is not running. It is a proved success all over the country. Tested under all conditions of farm work by owners who say it is the most wonderful implement they have ever used. It has hauled 9,200 pounds of wheat up into a farm elevator on high gear—pulled a 40 x 60 Minneapolis thresher, the largest size made and weighing 10,000 pounds, in a stubble field on high gear—moved a 25-ton story and a half house on trucks over dirt roads.

It is always ready, day and night. In the hot harvest weather when horses drop dead in the harness, it will do its work continuously 24 hours a day. Use your Ford headlights for night work. Anyone who can drive a Ford can drive Staude Mak-a-Tractor.

Utilizes Tremendous Power of Ford Engine

Staude Mak-a-Tractor utilizes the wonderful power of the Ford engine to turn two tractor wheels. The tractor attachment, itself, does all the actual pulling work. There is absolutely no unusual strain on the working parts of the Ford. The Ford rear axle drive shaft merely turns the pinion gears of a Staude Mak-a-Tractor. These gear a mesh with the tractor wheel bull gears and turn the wheels under.

with a Staude Mak-a-Tractor will start and run continuously on high gear and will do the work of four horses. Sixteen years of square dealing is behind this guarantee. Ask your banker.

Staude Mak-a-Tractor gear reduction reduces the speed of the Ford eleven times and gives an eleven-times increase in pulling power. This is the reason for the wonderful working ability of the Staude Mak-a-Tractor. It gives greater actual pulling power for the weight than any other farm implement ever built.

We positively guarantee that any Ford in good condition used

The Staude Mak-a-Tractor does not strain any part of the Ford, regardless of working conditions.

- First—It uses less than half the Ford power.
- Second—Motor speed is never over 1,500 R. P. M., equivalent to twenty miles an hour on a touring car.
- Third—It starts on high gear—cannot strain the differential.
- Fourth—Staude Mak-a-Tractor carries the rear of the Ford and pushes the Ford ahead.

Wonderful Cooling System—Remarkable Oiling System Included

Every service detail has been carefully worked out. The wonderful Staude Ford Radiator, furnished as regular equipment, has six times the cooling efficiency of the Ford radiator. Less than an ounce of oil—It guarantees perfect cooling for touring car and tractor both. We wouldn't think of selling you our Tractor attachment without this increased cooling capacity. Without it no tractor attachment can give satisfactory results. The new force feed oiling system, also regular equipment, gives positive feed to all main bearings through a side gauge on the dash.

With this wonderful cooling system, this remarkable oiling system and a motor speed which never exceeds 1,500 R. P. M. under the hardest work, the Ford motor used with Staude Mak-a-Tractor is more conservative, more efficient, more durable even than when it is used in the Ford touring car at its increased cost.

Use Any Ford You Can Get

If you have no Ford, get a cheap second hand one. A cheap Staude Mak-a-Tractor on it twenty minutes, get the best of both worlds in the world and the most efficient traction you can buy. And save the cost of your Ford and your Staude Mak-a-Tractor in the first month you use it.

SEND COUPON NOW

Only 25,000 Staude Mak-a-Tractors will be built this year. There will not be near enough to supply all farmers. Ask at once for a free literature. Don't miss this opportunity. Only those who send back the coupon will be in line for orders. Send the Coupon NOW—2x7x11. Send the coupon by mail. We will send you the Staude Mak-a-Tractor literature and a list of dealers. What it will do for you. You'll see your local dealer's arrangements for a demonstration on your own farm.

Breaking virgin sod, 7 in. deep with 2 bottom, 28 in. gang. (Reproduction from moving picture film.)

20 Minutes to Install

Mak-a-Tractor attachment clamps on a Ford with four bolts. No holes to bore. Rear wheels replaced with driving pinions—integral with brake drum. To change back to touring car, merely loosen and pull back Mak-a-Tractor axle and wheels—replace driving pinions with Ford wheels.

Mak-a-Tractor frame removable in five minutes. Can be left on car—scarcely noticeable—weighs but 50 lbs.—does not affect appearance or interfere with spring action.

11 Fords in 1

Greatest draw-bar pull for weight ever built. Greater strength in every unit of construction in proportion to work and weight required than any other tractor. Cost reduction in Mak-a-Tractor itself increases Ford power eleven-fold—increased speed proportionately.

No Strain on Engine

Staude roller pinions integral with leads drive rear wheels of Ford. Mesh into pinion gear on tractor shaft. Power applied rear outside rim of tractor wheel—no strain on hub or spokes. Mak-a-Tractor is built of Ford standard construction. Driving pinions push the tractor wheels down—no power wasted. Ford does no pulling. Mak-a-Tractor merely pushes car ahead of it, since all moving power comes from front end of rear wheels with the ground. With Mak-a-Tractor attachment 1 cord starts on high and runs on high all the time, proving conclusively that there is no strain. Motor speed is never more than the low speed of 1,500 revolutions per minute in low. Some speed as when touring car is making 25 miles an hour—sixty, equivalent speed for tractor.

Patented Force Feed Oil

Wonderful patented Force Feed Oiling system feeds oil to all bearings—main and pinion—lubrication diffusing automatically back from bearing car and tractor.

Self-Cleaning Gears (Patent Applied for)

Gears in the Staude Mak-a-Tractor wheels are self-cleaning, an exclusive feature of gear design. It causes in wear—prevents loosening of gear teeth. Grease, stones, dirt of all kinds are automatically removed from the gear teeth. The Staude Mak-a-Tractor runs as quietly and smoothly as a motor car.

Staude Concave Creepers

12 Special Staude Concave Creepers are furnished for each wheel. These may be bolted through the tractor wheel rim when equipped. The concave rolling edges grip soil and roll and give maximum pulling capacity. Special feature. Grooved, flat-edged creeps give the soil maximum motor power by making the engine "pull up hill."

Staude Ford Radiator—Extra Large

During all time speeds a motor speed up to 1,500 R. P. M. is maintained. The radiator is extra large. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor.

Cold Rolled Steel Axle

The Special Staude axle is 2 1/2 inches in diameter, made of cold rolled steel. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor.

Special Fifth Wheel Job 2 1/2 to 5 Miles Per Hour

Special Fifth Wheel attachment for touring car—very heavy, rigid and smooth. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor. It is a special feature of the Staude Mak-a-Tractor.
