

The ACME PERCHERONS

"Keota Jalap," 7610; sire, "Jalap," 6680; dam, "Gracious," 7933.

The Acme Percheron Stud is now headed by "Keota Jalap," First Prize Three-year-old at last year's Chicago International, and First in his class, and Champion of the breed at the 1918 Calgary Summer Show.

Acme Percherons are characterized by size, type, and quality, supported on limbs of wonderful strength and durability. These facts are fully substantiated by show-ring records, and satisfied customers.

I have a specially choice lot of young Stallions for sale, large, heavy-boned fellows with unsurpassed quality and breeding. All my horses are thoroughly acclimated. If you are in the market for a good horse, write and get my prices and terms, or better still, come and look over my stock.

MY PRICES AND TERMS ARE RIGHT

ALBERTA

FARMERS, BREED Percherons

England is breeding Percherons now. The homes of the Shire, the Clyde and the Suffolk are convinced of the usefulness of the grade Percheron. He is the active, light draft horse, light and clean enough to work in all weathers, and drafty enough to pull equal with the heavier horse, and active enough to trot with his load. He is the universal draft type.

Besides England, Australia and New Zealand are going to breed Percherons, and are now seeking them.

The demand for the Percheron promises to be the most staple of all the draft breeds. The Percheron is daily making friends of men who, in their own countries, are directors of their leading agricultural associations, and exercise a powerful influence in moulding public opinion of desirable types of horses. No other draft breed than the Percheron could have made the stalwarts of the other breeds waver and finally come over and support a foreign breed. Neither could the Percheron have done it, did it not possess those valuable characteristics and merits that even the most bigoted man must acknowledge.

That demand is necessary to you, Mr. Farmer, to guarantee a sure market for your horses, and those sterling qualities of endurance are as necessary to you in your daily work as they were to the gunners and teamsters in France.

Don't Hesitate--Breed Percherons

We are one of Canada's largest importers of strictly high-class Percherons.

C. D. ROBERTS & SONS

"Kolombin," 5186. Our Champion Percheron Stallion at Brandon, Regina, Saskatoon, North Battleford and Prince Albert Summer Fairs, 1916. This Horse weighed 2,310 lbs.

To the Farmers of the Canadian North-West we wish the

SEASON'S GREETINGS

and sincerely hope that the year 1919 may be a happy and prosperous one. Now that peace has been declared, the far-sighted farmer will devote more of his attention to the breeding and raising of livestock. Owing to the world's shortage of heavy drafters, horse breeding will be one of the best paying occupations that he can engage in. Through his merits the Percheron Horse has become the most popular draft breed on the American continent today.

OUR WINTER OFFERING

Our capacious stables are full of well bred, large dark grey and black Percheron stallions, weighing from 1,900 to 2,200 pounds. These combine size and quality to a remarkable degree and the ages run from two to five years. Such sires as "Jalap," "Forfait Junior" and "Olbert" are prominent in the pedigrees of our young imports. Those of our own breeding are from our large quality brood mares which have been promoted stallions. Those of our own breeding are from our large quality brood mares which have been promoted stallions. Those of our own breeding are from our large quality brood mares which have been promoted stallions. Those of our own breeding are from our large quality brood mares which have been promoted stallions.

Write us for full particulars and prices. We give liberal terms to responsible parties.
