Henry George's Paper.

We have received a copy of the first edition of Mr. Henry George's paper called the New York Standard. It is a weekly publication, and devoted to the discussion of social problems. Many of its articles are signed by the writers. All the articles are signed by the writers thereof. This scheme will relieve Mr. George's idea of the common ownership of land and the freedom of improvements from taxation is one which will take much hammering and explanation to make intelligent to the popular mind, and that he has undertaken to publish a paper-devoted to his pet theory will be gratify ing to all those interested in his theary. It is a sixteen page paper, and one of its peculiarities is that it has only one column of advertisements. Where the "unearned increment" is to come from is what his experienced brothers in the profession would like to know.

The double end snow plough constructed especially for this line has proved a great success. It would be well if the L. C. R. would adopt this style of snowplough on all its branches.

Scarcity of Water.

The water in the tank near Mr. William Robinson's has lately been getting lower and lower until now it is with difficulty a bucketful can be got out of it. This tank has been of great public benefit, a large number of citizens procuring their entire water supply from it, and who are now much inconvenienced by it being allowed to run dry. The airramichi Skating Rink Co. and the people in the vicinity should get the tank repaired by subscriptions among them, as they should not expect the firewards to tax the town for its repairs, as it is not which the alumni and graduates will be asked to subscripto.
