

Oxfords! Oxfords!!

Oxford Shoe weather is here. The rush is now on. Have you selected YOUR pair? If not, don't YOU think that YOU should do so AT ONCE while the assortment is complete—and always bear in mind that this store is noted for fine, perfect-fitting, good-quality Oxfords for the whole family.

A Great Advantage

Our great advantage which we have is, we buy all of our Shoes for prompt cash and have our choice from the best lines made in Canada and the States.

Hagar Shoes

We also have the sole agency in this city for the celebrated Hagar Shoes, which are by far the most stylish and best shoes made in Canada.

Cushion Sole and Red Cross Oxfords

These are two new lines introduced this season by this store. They are going to be very popular, as they are not only NEAT, but oh, so comfortable to walk in. We candidly state that never before have we had such a good assortment in tan, patent and black kid Oxfords as we have at present.

SOME PEOPLE do not wear Oxfords, but prefer a light weight laced or button shoe for summer. We have a splendid assortment of just such Shoes for women, men and children, and also COMFORT SHOES for old ladies.

YOUNG MEN, that new suit of clothes will look much better if you have on a pair of our up-to-the-minute American Shoes; prices range from \$3.50 to \$7.50, in tan, patent and black kid. See our window for some of the styles.

STETSON SHOES for men, the highest grade Shoes imported into Canada, for sale at this store.

SHOE TREES—Every person should have one or more pairs of Trees. They are a good investment; prices 50 and 75c.

J. D. CLIMIE, 30 and 32 King West

MILITARY GOSSIP

One week from to-morrow, Sunday, May 23, His Excellency the Governor-General will be in Hamilton to unveil the tablet which is being erected by the local Patriotic Fund Committee in memory of the Hamilton heroes who lost their lives during the Boer war in South Africa. This information, as announced in the Times at the time, was received by Major Tidwell a few days ago, and has been the cause of much satisfaction in the local garrison. The officers are holding a meeting to-night to consider what form the reception will take. A brigade parade will be held.

Lieut.-Col. Septimus Denison and Lieut.-Col. Logie inspected the right half of the Thirteenth Regiment last night, and both expressed themselves as highly pleased with the work of the men. The orders were carried out with that snap and vim which has made this regiment famous all over Canada. Two hundred and twenty-six men were on parade. The parade state was as follows: Major Ross, Capt. Donville, Adjutant, Staff-sergeant, 5, Band 30, Signallers 8, Guards 12, A 43, B 46, C 44, D 46; total, 226.

The parade night of the Dragoons has been changed from Wednesday to Monday night.

While inspecting the Thirteenth Band last night, Col. Denison made particular

cers and men of the Army Service Corps was opened last night in the old Drill Hall. Staff-Sergeant Hughes, of the Kingston permanent A. S. C. detachment at Niagara, been sent here to conduct the class. The instruction will be along the lines of Army Service Corps duties, and to those who pass the examination, which will come at the conclusion of the class, promotion will be given. The classes will be held on Monday, Wednesday and Friday nights for three weeks, and will take the form of lectures.

The A. S. C. has been fortunate in securing a fine, strapping bunch of recruits, and will likely acquire themselves with credit, as usual, at camp this year.

IMPROVEMENTS AT RANGES.

Capt. Lindsay, commanding officer of the engineer corps for Western Ontario, held a consultation with Col. Logie yesterday in regard to improvements at the rifle ranges. Several changes will be made, and although no extension is looked for in the ranges, several conveniences will be put in. Shooting began a week ago today, and although no complaints were received about the condition of the ranges, it is understood that a little fixing up will not come amiss.

TO CAMP OUT.

Capt. Robertson and his company, "A," of the Thirteenth, will camp out at Burlington over Saturday and Sunday. The camp will be conducted as nearly as possible under active service conditions.

FIRST DRILL WITH NEW GUNS.

The artillerymen turned out in strength last Thursday night to study the workings of the new 18-pound quick firing guns, just arrived from England. The guns and ammunition wagons have all arrived and one of them was wheeled out on the floor of the drill hall Thursday night and fired at the officers. The new features and the workings of the mechanism. The gun weighs about 900 pounds and is about 8 feet long, which is about 300 pounds heavier and 2 1/2 feet longer than that formerly used. It has a new style automatic breech which is opened and closed by motion. The wheels are only about 4 inches lower than the old ones, but the guns are set closer to the axle-tree which makes the whole carriage appear considerably lower and steadier. It works in a cradle and has a hydraulic buffer above the gun and parallel to it which absorbs the recoil. The trail is longer than the old one and tubular in shape, having a spade arrangement at the end which engages the ground. When in action with the spade engaging the ground and the brakes applied on the wheels, the carriage is anchored and the gun recoils in the cradle, the shock being taken up by the hydraulic buffer. As there is no recoil of the carriage it is not necessary for the gunners to stand clear and two of them remain on the seats attached to the carriage while the gun is fired. The gun has a shield for the protection of the gunners which is supposed to resist nickel pointed rifle bullets. The carriage is provided with which allows the direction to be changed four degrees to the right or left without shifting the carriage. The elevating gear is so arranged that the elevation necessary for the range is put on by another man, fired by pulling a lever. The gun is independent of the lanyard instead of using a friction tube and lanyard as formerly. The gun and carriage are well balanced on the axle-tree, and the traversing lever (hand spike) is curved so that good leverage is secured. Formerly it was straight, and to a certain extent the men lifted against the lever. Fixed sights are used, each round consisting of fuse, shrapnel shell and cartridge case, with percussion primer and charge. The fuse weighs 104 ounces, and burns for about 22 seconds at rest. The shrapnel shell is made of steel, has a bursting charge of 14 ounces of fine grain powder, and contains 34 mixed metal bullets, 41 to the pound. The cartridge, which before was carried in shallow bag, and had to be loaded separately, is now contained in a metal cartridge case and attached to the shell the same as the ammunition for ordinary rifles. The muzzle velocity is estimated at 1,610 feet per second, or about one mile in thirty seconds. The extreme range is about 6,300 yards. The duties of the gun detachment are divided as follows: No. 1, commanding; No. 2, range setter; No. 3, layer; No. 4, loader; Nos. 5 and 6, fuse setters.

In action the ammunition wagon is brought up close behind the gun, and the ammunition handed directly to the loader. Instead of being brought up from the rear as formerly, A well-trained detachment should in an emergency fire 28 rounds per minute.

SIZE OF CAMP REDUCED.

According to present plans, Niagara Camp for this year will muster a thousand less than last year. This is in spite of the fact that the accommodation is now a hundred acres or so greater than last year, and there are about twice as many rifle ranges. In order to keep the militia expenditures within the estimates, it has been decided that some of the corps which usually go into camp at Niagara will be quartered in the headquarters this year. Among those notified to that effect are:

INSTRUCTION CLASS.

The class of instruction for the offi-

cers and men of the Army Service Corps was opened last night in the old Drill Hall. Staff-Sergeant Hughes, of the Kingston permanent A. S. C. detachment at Niagara, been sent here to conduct the class. The instruction will be along the lines of Army Service Corps duties, and to those who pass the examination, which will come at the conclusion of the class, promotion will be given. The classes will be held on Monday, Wednesday and Friday nights for three weeks, and will take the form of lectures.

The A. S. C. has been fortunate in securing a fine, strapping bunch of recruits, and will likely acquire themselves with credit, as usual, at camp this year.

TO CAMP OUT.

Capt. Robertson and his company, "A," of the Thirteenth, will camp out at Burlington over Saturday and Sunday. The camp will be conducted as nearly as possible under active service conditions.

FIRST DRILL WITH NEW GUNS.

The artillerymen turned out in strength last Thursday night to study the workings of the new 18-pound quick firing guns, just arrived from England. The guns and ammunition wagons have all arrived and one of them was wheeled out on the floor of the drill hall Thursday night and fired at the officers. The new features and the workings of the mechanism. The gun weighs about 900 pounds and is about 8 feet long, which is about 300 pounds heavier and 2 1/2 feet longer than that formerly used. It has a new style automatic breech which is opened and closed by motion. The wheels are only about 4 inches lower than the old ones, but the guns are set closer to the axle-tree which makes the whole carriage appear considerably lower and steadier. It works in a cradle and has a hydraulic buffer above the gun and parallel to it which absorbs the recoil. The trail is longer than the old one and tubular in shape, having a spade arrangement at the end which engages the ground. When in action with the spade engaging the ground and the brakes applied on the wheels, the carriage is anchored and the gun recoils in the cradle, the shock being taken up by the hydraulic buffer. As there is no recoil of the carriage it is not necessary for the gunners to stand clear and two of them remain on the seats attached to the carriage while the gun is fired. The gun has a shield for the protection of the gunners which is supposed to resist nickel pointed rifle bullets. The carriage is provided with which allows the direction to be changed four degrees to the right or left without shifting the carriage. The elevating gear is so arranged that the elevation necessary for the range is put on by another man, fired by pulling a lever. The gun is independent of the lanyard instead of using a friction tube and lanyard as formerly. The gun and carriage are well balanced on the axle-tree, and the traversing lever (hand spike) is curved so that good leverage is secured. Formerly it was straight, and to a certain extent the men lifted against the lever. Fixed sights are used, each round consisting of fuse, shrapnel shell and cartridge case, with percussion primer and charge. The fuse weighs 104 ounces, and burns for about 22 seconds at rest. The shrapnel shell is made of steel, has a bursting charge of 14 ounces of fine grain powder, and contains 34 mixed metal bullets, 41 to the pound. The cartridge, which before was carried in shallow bag, and had to be loaded separately, is now contained in a metal cartridge case and attached to the shell the same as the ammunition for ordinary rifles. The muzzle velocity is estimated at 1,610 feet per second, or about one mile in thirty seconds. The extreme range is about 6,300 yards. The duties of the gun detachment are divided as follows: No. 1, commanding; No. 2, range setter; No. 3, layer; No. 4, loader; Nos. 5 and 6, fuse setters.

In action the ammunition wagon is brought up close behind the gun, and the ammunition handed directly to the loader. Instead of being brought up from the rear as formerly, A well-trained detachment should in an emergency fire 28 rounds per minute.

SIZE OF CAMP REDUCED.

According to present plans, Niagara Camp for this year will muster a thousand less than last year. This is in spite of the fact that the accommodation is now a hundred acres or so greater than last year, and there are about twice as many rifle ranges. In order to keep the militia expenditures within the estimates, it has been decided that some of the corps which usually go into camp at Niagara will be quartered in the headquarters this year. Among those notified to that effect are:

INSTRUCTION CLASS.

The class of instruction for the offi-

cers and men of the Army Service Corps was opened last night in the old Drill Hall. Staff-Sergeant Hughes, of the Kingston permanent A. S. C. detachment at Niagara, been sent here to conduct the class. The instruction will be along the lines of Army Service Corps duties, and to those who pass the examination, which will come at the conclusion of the class, promotion will be given. The classes will be held on Monday, Wednesday and Friday nights for three weeks, and will take the form of lectures.

NEW RULES FOR BISLEY.

Several important alterations have been made for the Bisley meeting next July. One of these is that the disallowance of the score of an individual in a team match will involve the disallowance of the score of the whole team. And in a competition in which each shot is separately signalled, the score of a competitor who fails to fire the requisite number of shots shall be disallowed—unless such failure be occasioned by illness or any other urgent cause, allowed by the Bisley Committee.

For match rifles the weight of the rifle barrel, not including any removable appliances, is not to exceed four pounds. This year no change is made in the dimensions of the first, second or third class targets, but the whole of the inner of the 200-yards target will be white.

In all grand aggregate competitions, except the Alexandra, two practice shots will be allowed before the sighting shot—at the same target, of course, as that at which the marksman is about to be the competitor.

COSSACK RIDING.

It is said by the Neue Militaerische Blaetter that the Russian Government is taking steps to maintain a high level of horsemanship amongst the Cossack population. Young men are to be encouraged to regard riding as a "sport," and to enter into those systems of "trick" riding which are associated with the Cossacks, but for which they seem to have partly lost their taste. On Sundays and holidays there are to be competitions, and the War Department is offering prizes in all the districts to youths who, in competition of their military service, show the required proficiency in competition with one another.

ONE SHOT EACH 45 SECONDS.

The executive of the Dominion Rifle Association has shortened the time limit for shooting, it is understood, making it forty-five seconds per shot, instead of a minute, as formerly, was the rule. During that forty-five seconds a man has to get off his shot and allow the markers time to signal back the results. Usually this later operation takes but a few seconds, but circumstances, sometimes arise which may prevent them acting as promptly as is generally the case. Altogether the new rule, if rigidly enforced, will save time in the long run, but marksmen will certainly have to hurry in order to lose no time getting ready to shoot.

NO PICKETS AT ALDERSHOT.

The rule abolishing the necessity for pickets at Aldershot has freed some 500 men daily from an irksome and unpleasant duty. The men of this great military establishment have been put on their honor, so to speak, so far as behavior is concerned, and according to reports from General Smith-Dorrien, the plan has worked out very satisfactorily. The 9th Field Battery (Toronto), Canadian Field Artillery, under the command of Captain W. J. Brown, will go to camp as part of the second brigade field artillery, and not only will they do so, but they will go in full strength and in a good state of preparedness. This unit is in splendid shape and will, without doubt, give an excellent account of themselves not only on the historic common at Niagara, but afterwards at their gun practice at Petawawa.

AMERICAN TARGETS.

In view of the adoption of the new firing regulations, which go into effect on January 1st, 1910, the Ordnance Department, U. S. A., has taken up the matter of targets and is preparing drawings and alterations for all the various types of targets. All the old targets are to be gone over, to see if they can be improved, and several new ones are under consideration for adoption. Among these is the sliding vertical target, the Simplex, which is operated by a pedal, and one target rises as the other goes down. Another is the Brinton sliding target, or falling target, arranged on an axis. Instead of the old round black and drab pastor ball's eyes there will be used this year a new device, consisting of sheets perforated into squares, one side of which will be black and the other drab or brown. These will be placed, a whole sheet being brushed with paste and the sheets of arate pieces put in place very quickly. The change is in the direction of economy, many of the old style being wasted annually.

INSPECTION.

The following important order respecting the annual inspection of the various corps in the Canadian militia has just been issued from Ottawa, and should receive the earnest attention of every N. C. O. and man. The commanding officer may be safely trusted to do his part in carrying out its provisions. It is up to his subordinates to do theirs. The order reads thus:

"With reference to the inspection of militia units, the day of inspection by the Inspector-General, or the officer acting for him, will be counted as an obligatory period of annual training, and no officer or man not present at the inspection will be permitted to draw the full allowance of twelve days' pay, unless the officer commanding can certify that he was unavoidably prevented from attending and had obtained leave of absence from him."

ANGEL HORSEMANSHIP—Scene: Riding School.

Sergeant-Major Instructor (to recruit jogging round flapping his elbows)—You, No. 4! What's your name?

Recruit—Angel, sir.

Sergeant-Major Instructor—Angel, eh? Then keep your wings still! (Framed original drawing to R. Richards.)

Sergeant-Major (to trembling orderly-sergeant)—If you are such a thundering fool that you cannot remember a simple thing like detail for the day, just do as I do, and jot it down in your notebook.

Real English SUITS and OVERCOATS

to Measure from \$5.14 to \$20.

Cut in Latest London and New York Style, whichever preferred. No matter what part of the dominion you live in, we undertake to supply you with a smart, comfortable suit, fitting you perfectly, or otherwise to refund your money in full. The process is simple, merely fill in a post card and address same to us as below, asking for our latest assortment of materials. Together with patterns, we send you fashion-plates and complete instructions for accurate self-measurement, tape measure, all sent free and carriage paid. We dispatch your order within seven days, and if you do not approve, return the goods, and we will refund the money.

SUITS and OVERCOATS to measure from \$5.14 to \$20. SEND FOR FREE PATTERNS.

HEAD OFFICE, - - 6 JAMES N.

S. GILLIES, President GEORGE J. GUY, Manager

It wasn't fair to peg the other N. C. O.'s for laughing.

Musketry Instructor—For heaven's sake be careful with that rifle, man! You just missed me that.

Private Cook—Did I, sergeant? I'm awfully sorry.

Spud Murphy—I say, Nobly, when are you going to pay me back that bolus you borrowed in the canteen the other day?

Nobly Clark—I'm a soldier—noe a prophet.

The Bouncer—My proudest boast is that I was one of the men behind the guns!

The Skeptical Gunner—How many miles behind?

THE OATH OF CORONATION.

Asquith Thinks It Time to Alter Some of Its Clauses.

Mr. Redmond's Catholic Disabilities Bill Passes Second Reading.

A Great Gain For Catholics—Protest From Orangemen.

London, May 14.—Mr. John E. Redmond's bill for the removal of Roman Catholic disabilities passed its second reading in the House of Commons this afternoon by a vote of 133 to 123, and was referred to Committee of the Whole by 124 votes to 121. Besides removing the Catholic disabilities the measure provides for the deletion from the coronation oath of certain clauses objectionable to Roman Catholics. As the bill is not a Government measure, there is little likelihood of its being pressed to a third reading this session. The passage of the second reading, however, is looked upon as a great victory for the Catholics. Although similar bills have been before the House on various occasions, none have ever reached this stage.

Mr. Asquith, who spoke early in the debate, gave his full support to the object of the bill. The exclusion of Roman Catholics from the Lord Chancellorship of Great Britain and the Lord-Lieutenancy of Ireland, he declared to be unjustifiable on the grounds either of logic or policy. The accession declaration, he said, was a flimsy and unnecessary safeguard of the Protestant succession, dated from probably the worst period in our history. It could not be justified and the time had come to put an end to it.

Lord Edmund Talbot pointed out that there were many Catholics in the colonies, and it would be wise state-manship to make the change in the declaration.

CANADIAN CITIES CANADIAN EX-AMPLES.

In seconding the rejection of the bill, A. C. F. Boulton said that in recent times the Pope had claimed the right to interfere in the internal government of the British Empire. (Cries of "No.") He referred to the Jesuit states act passed in Canada in 1888. The Roman Catholic Church had been shown, by what had happened in Canada, to be not only a religious but also a political body.

The correspondence embodied in the preamble of the act, as to the sale of the property of the Jesuits, showed that the Pope had therein granted permission for the sale of land belonging to the Crown. (Ironical Nationalist cheers and cries of "Oh") Moreover, the Church had fulminated against one particular party in Canada, thereby interfering with politics.

That part of the oath which is particularly objected to by Roman Catholics is as follows: "I, A. B., by the Grace of God, King of Scotland, England and Ireland, Defender of the Faith, do solemnly and sincerely in the presence of God testify and declare

BOY SHOT DEAD.

Dundas County Man Fired Shotgun to Scare Chariwari Crowd.

Chesterville, Ont., May 14.—Ross Beekstead, aged 18, was shot and instantly killed at McMillan's mill, about four miles from Chesterville, at 9 o'clock last night. Isaac Garlough, aged 40, lies in the local jail awaiting the action of the Coroner's jury. The body of Beekstead was not discovered until 8 o'clock this morning, when John Egan, a passing farmer, found it in the corner of a field by the roadside. Garlough acknowledged having fired off his shotgun to frighten boys who were bothering him by throwing stones at his house about 9 o'clock last night and it is thought this shot must have killed Beekstead, as there were buckshot wounds in the head.

The boys gathered every evening to worry Garlough, who lives in the Township of Williamsburg, breaking his windows and stoning him from his house. He fired at them from his window, but did not hit any of the gang, which decamped.

Beekstead was not connected with these proceedings and is presumed to have arrived at the scene to see what was doing as the gun was fired. He was the only son of a widowed mother. The village is vastly excited.

Minister of Defence Pearce, Col. U. E. Bridges, Chief of the Intelligence Department, and Capt. W. R. Cresswell, Director of Australia's naval forces, have sailed to attend the Defence Conference.

SQUAT IFF

SOLID GOLD WATCH PUZZLE GREAT OFFER BY A RESPONSIBLE FIRM. IT COSTS YOU NOTHING TO TRY.

To any person who can supply the correct names of these two well-known English Towns, and fill in the following conditions before we close our offer, I will send a SOLID GOLD WATCH. Fully Jewelled (English Government Stamp) as a FREE GIFT. (Silver Watches are presented to Gentles.) Send your attempt to a sheet of paper, together with a stamped, addressed envelope for reply to: YELLOWS, 10, Abchurch Lane, London, E.C. 4. The winner is required to purchase a watch from us as well as to send in the correct answer. The prize must be sent to the winner. Please send your attempt to: Miss Edith J. Hall, North West Harbor, Shell Co., Nova Scotia. Mr. W. H. Cotter, McKinnon, Sask.

New Health for School Girls

Is a girl's health to be sacrificed in order that she may pass high at examination time? Is her future happiness to be risk
