Young's New Axle Cutter
Patented in the United States and Dominion
of Canada. We would call the attention of
all owners of carriages or waggons to this
Machine and the benefits derived from its
use. All waggon axles after being two or
more years in use become worn till they
become loose, requiring the use of leather
washers to take up the lateral play; the
washers soon filling with sand, cause
the axles to wear much faster, unt the
axle is soon ruined, or nearly so.

THE REMEDY. By the aid of this very simple machine, the shoulder for the axle nut is cut back and the thread extended, allowing the nut to be screwed farther on, causing the wheel liturn as evenly as when new. Give us a cap before purchesing elsewhere. A Paint shop is in connection with the Factory.

BY Orders respectfully sol'cited and sutisfaction guaranteed.
