

Try BEAVER FLOUR Both Ways

Make up a batch of Bread and Rolls with it. Then bake a Pie and Cake.

Notice the fine, even texture—the absence of holes—the delicate, nutlike flavor, of the Bread.

Then consider the lightness and flakiness of the Pastry. You'll never go back to the coarse, almost tasteless western wheat flours, after once enjoying the flavor of the good things made with Beaver Flour.

THE TONIC THAT BRINGS HEALTH

"Fruit-a-tives" Builds Up The Whole System

Those who take "Fruit-a-tives" for the first time, are often astonished at the way it builds them up and makes them feel better all over. They may be taking "Fruit-a-tives" for some specific disease, as Constipation, Indigestion, Chronic Headaches or Neuralgia, Kidney or Bladder Trouble, Rheumatism or Pain in the Back. And they find when "Fruit-a-tives" has cured the disease, that they feel better and stronger in every way. This is due to the wonderful tonic properties of these famous tablets, made from fruit juices.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

BOIESTOWN

Concert was a Grand Success

Boiestown, April 17—Our young folks presented their concert on Wednesday evening to a pleased audience. Much credit is due Mrs. Burt Carson and her associates for the successful way in which the program was carried out, and thanks are due friends of Parker's Ridge who helped by attendance and so forth in making the affair the success it was. Much of this is also due to the organists, Miss Annie Cameron and Mrs. Ethelbert Norrad. The proceeds are to go towards a new public hall. Candlemas Day certainly told no falsehood this year. Fine and clear, two winters in one year.

Alex. Carson, Jr. was to Fredericton this week on a visit to relatives. Mr. and Mrs. Walter Cameron have returned home after spending the winter at Mrs. Carroll's.

PHYSICIANS PRESCRIBE DRUGGISTS RECOMMEND TAROL

Because they know its composition and its effects.

TAROL is recognized today as the most efficacious remedy for the relief and cure of diseases of the Throat, Bronchi, and Lungs. It is not a secret remedy; its composition is well known and numerous cures are proof of its curative power.

TAROL relieves the cough and acts as an expectorant and tonic to the bronchi and lungs. This is why it should be used in preference to all other preparations for the relief and cure of

Coughs, Colds, Bronchitis, Grippe, Asthma and Tuberculosis.

Needless to look elsewhere for a cure; needless to try new remedies, "TAROL" is the remedy which will cure you promptly, pleasantly and surely.

Prospects for the 1917 Potato Crop

Present conditions indicate a potato, production and unless good seed is planted, a comparatively poor crop may be expected. This is particularly true in many sections. The unfavorable conditions prevailing during the last two years has probably weakened much of the stock in other sections of Canada and the United States, and owing to the scarcity and high price of good seed, much poor stock will be planted, which is almost sure to result in a low yield unless something is done to supply good seed.

Fertilizer

The scarcity of fertilizer containing a sufficient supply of potash will undoubtedly react, to some extent on the crop. Many farmers will plant a smaller acreage on a good quality of fertilizer, while others will endeavor to get along without any, or use reduced quantities. This condition will be most marked in sections where the growers have been depending on commercial fertilizer, and to a smaller extent where barnyard manure or clover crops have been regularly ploughed under.

Labour

The potato crop requires a good deal of hard labor, particularly in sections where modern machinery is not used, and the scarcity of farm laborers will undoubtedly further reduce the acreage planted and may also reduce the yield per acre, due to poor cultivation. This scarcity will not be felt in sections like New Brunswick or Maine, where the farmers have the necessary potato machinery, but it will be very acute in many large areas like Ontario where hand-planting, hand-hoeing and digging are quite extensively practiced.

Value of Crop

The above four conditions indicate a small crop, but the possibility of receiving a high price will induce many to plant more extensively. However, indications at present are that this will not offset the scarcity due to other causes.

In view of the fact that these conditions exist in an aggravated form outside of New Brunswick, in large potato areas, the total crop for North America will be even smaller than during the past season, and farmers who have large quantities for sale will likely reap a vast harvest.

WALNUT MARBLE CAKE

One-half cup butter, 1 cup sugar, 1 egg yolk, 1-2 cup milk, 2 egg whites, 1-3-4 cups flour, 3 teaspoons baking powder, 1 teaspoon cocoa, 1 cup chopped walnuts, 1-2 teaspoon cinnamon, 1-4 teaspoon nutmeg, 1-4 teaspoon salt. Cream butter; add sugar, yolks of eggs beaten thick; flour in which baking powder must be sifted, not be felt in sections like New Brunswick or Maine, where the farmers have the necessary potato machinery, but it will be very acute in many large areas like Ontario where hand-planting, hand-hoeing and digging are quite extensively practiced.

A teaspoon of lemon juice in a small cup of black coffee almost always relieves a bilious headache.

Quality of Seed Stock

The quality of the seed stock is one of the most important factors in

What then are the existing conditions which are liable to influence the potato crop in North America (1) Price of seed stock (2) quality of seed stock (3) supply of the necessary fertilizer, (4) necessary labor (5) Probable value of the crop. With the exception of the last condition, all tend to show that we may have a scarcity during the coming season.

Price of Seed Stock

The price of seed being one of the initial costs, influences to a large extent, the acreage planted. The average New Brunswick farmer plants six barrels of potatoes valued at \$5.00 per barrel, will expend \$30 on seed alone. Moreover, the Ontario and American farmer will pay \$8 or more making the cost of seed approximately \$50 per acre. This condition will tend greatly to reduce the acreage over a very large area.

Quality of Seed Stock

The quality of the seed stock is one of the most important factors in
