

Town Talk.

Surrounded by Fire.

Since Thursday last, the whole country around Goderich has been in one fierce blaze, lighting up the sky at night with a lurid glare and filling the atmosphere of the town with a dense smoke. On the side the fire started between the bank of Mr. Isaac Sakeld and Mr. H. Segullier in Goderich Township, and under the influence of a south wind came tearing through Mr. R. Wilson's woods towards the town on Saturday afternoon almost touching the southern boundary within a short distance of the new slaughterhouse. But for a change of wind to the north, which then took place, the town was in imminent danger, and no power on earth, in the present destination of water, could have resisted the march of the flames. On the change of wind, the fire went back towards the point of starting, in its passage seriously threatening Mr. Segullier's cleared farm, and breaking out half a mile beyond Mr. Sakeld's, in Mr. John Andrews' bush, passing through the woods of Messrs Johnston, Fuller and Shelly, in dangerous proximity to the house of the last-named gentleman. It is now raging in the bush recently purchased by Messrs Standly & Co. Some 300 acres of bush are destroyed and Mr. Segullier has lost in addition 100 cord of wood. Across the field to the north of the town, a fire started beyond Mr. Donald Cummings, and passed through his lot, completely sweeping the property of Mr. Kirkpatrick, destroying 400 cords of bark and 300 cords of wood belonging to that gentleman, and from 500 to 600 saw-logs belonging to Messrs Standly & Co. It then passed into Mr. Anthony Allen's bush, doing serious damage. Here it was being incessantly cared in and thrown on the fire, and it is now burning lower. The residents can only trust that the wind may providentially be kept from rising. The whole surrounding country is more or less on fire, and no human assistance could save crops and buildings in the direction of wind, if it should again rise. The origin of these fires is so far a mystery. We sincerely hope no one will now have the temerity to set fire to follow, when the disastrous consequences must, through the recent drought, be so wide-spread and serious.

TO SPORTSMEN.—In this dry weather, sportsmen will do a kindness to the farming community by refraining from indulgence in otherwise unobjectionable sport. The gun wedding even is quite sufficient to start a fire when everything in the bush is so ready to catch the slightest spark. We are severely enough afflicted with bush fires at present, and all should be ready to deny themselves anything, which might put the woods in danger, which are so far from free from fire.

BASTER.—This is a very useful invention that can be attached to that other useful invention—the sewing machine. It saves a great deal of trouble, a great deal of time, and much busting thread. When attached to the machine, it is self-guiding. It is simple, durable and useful, and very soon pays for itself in material. Mr. Abraham Smith, Merchant Tailor, is agent for here.

NEW PHOTOGRAPH GALLERY.—Mr. J. W. Whitley has opened a Photograph Gallery, above the store lately occupied by Mr. John Harris, where he has all the appliances necessary to make good pictures.

THE FARMER SAVING MACHINE.—Mr. Johnson has opened the store next to Mr. Yates' Grocery with a large stock of the Farmer's Machine and intends, as he is capable of doing, to push the business with energy.

Eloquent Sermon.—The Rev. Jas. Caruachal, of St. George's Cathedral, Montreal, preached in St. George's Church here on Sunday last. His sermon was a model of eloquence and brevity, so artistically earnest and yet simple, that it made a deep impression on the audience.

Lazarus, Morris & Co's, celebrated perfect Spectacles and Eye Glasses, confer the greatest benefit on persons needing assistance to sight. For near or far sight, for the weak eyes, or impaired vision they are alike invaluable, always assisting the sight, strengthening and preserving the eyes.

WIRE BEATING.—Samuel Noble, whose case was adjourned on Friday last, was today (Tuesday) tried before Judge Brown found guilty and sentenced to one year in the Common goal with hard labor.

MAGISTRATES COURT'S.—9 Sept. 1871, before C. Crabbe Esq. J. P. Van-riek's Powers. The defendant Powers, a very respectable-looking man, was charged with stealing a pair of pants, from the proprietor's room in the Royal Canadian Hotel. A witness swore to seeing the defendant with the pants on, and the constable found them under the planks of the stable. Defendant acknowledged wearing them, but said he had purchased them. He was committed for trial. 12 Sept. 1871 *Beatty v. Geo. Hay*, *Johnston and James Johnston*. M. C. Cameron for plaintiff, J. S. Sinclair for defendant. This was a case of evasion of toll at the Nile check-gate. Each defendant was fined \$5.00 and costs. *Harley v. Smith*, before Mayor Hays, W. R. Smith for defendant, the defendant being charged with depositing ashes on Mr. Hawley's lot, after three warnings, to the injury of said lot. Fine one shilling and costs, \$3.00.

GRAMMAR SCHOOL.—Mr. Preston having been compelled, through serious illness, to resign his position as Headmaster of the High School (which all our townspeople will much regret to hear) the Board has unanimously appointed to the position Hugh Innes Strang Esq. B. A. the successful and popular Principal of the Own Sound Union High and Public Schools. We believe the appointment is a most judicious one. Mr. Strang will commence his duties on 1st October.

To the Editor of the Signal.

Having read communications in your paper on the subject of Bread, let me through the medium of your paper, ask the City Fathers, or rather the City of them, how it is that the By-Law is not put in force, compelling the bakers to give us four pounds of Bread, instead of the four pounds loaf? I want to know.

AN EXAMPLE.—The other day several boys were brought before the Mayor and fined \$1.00 each, for bathing with shameless publicity, near the foot-bridge. This nuisance is to be put down, and parents had better stop their boys, or it may cost them money.

THE LADIES' DEPARTMENT at the Horticultural Show of the past has not been all the taste and talent of the ladies of this vicinity would have led us to expect. We hope, on the 15th inst., they will make as good a public exhibition of the useful and ornamental in Ladies' Work as they do in their own homes.

A LOOK INTO FUTURITY.—Madame Monner is now sojourning for a short time at the British Exchange Hotel, where she is ready to be consulted about those "coming events" hidden from ordinary vision but naked and open to the "Seeing Medium." Read Madame Monner's advertisement in another column.

CHOS LONORANCE.—The Star adopts the Chief Superintendent's view on the New School Bill, but describes him variously as "E. F. Ryserson Esq" and "Mr. Ryserson", in celestial ignorance of the fact that this is the Ryserson, who has both a clerical and scholastic prefix to his name and is commonly known as the Rev Dr Ryserson. It is too bad of the Star not to know the titles of one of Sandfield Macdonald's masters.

ASTONISHING.—The dense cranium of the star has at last been penetrated with the fact, which we have been urging on the notice of the Town Council for months, that the docks are in a condition disgraceful to their reputation and damaging to the trade of Goderich and imperatively demanding repair. Surely the Municipal Warden will now see fit to apply a remedy, when the necessity of the case has reached our contemporary in the distant "blackness of darkness" in which it revolves. The only new light found is the astronomical discovery by the Star that some part of the harbor is in the shape of a half-moon.

MECHANICS' INSTITUTE.—Some influential gentlemen are, we understand, setting themselves to the task of reviving the Mechanics' Institute. In this they will have the good wishes and assistance of all who consider the much neglected literary taste an essential element in rational prosperity. A little enthusiasm is all that is wanted to make the revival of the Institute a success.

PUBLIC SCHOOL TRUSTEES.—The Board met on Thursday evening, 7th inst. All the members present, except Mr. Kay. Minutes of last meeting read and approved. Application from Miss M. Mahon, to be appointed assistant in St. David's Ward School was read, also application from Miss Wilson to be appointed successor to Miss Logan. Moved by Mr. Debor, sec. by Mr. Swanson, and carried, that Miss Wilson be so appointed for quarters ending 31st Dec., at the rate of \$225.00 per annum. Communication from Mr. J. R. Miller, County Inspector, was read intimating that he had granted permits to Miss Trainer, Miss Logworth, Miss McMahon and Miss Logan, till next meeting of the Board of Public Instruction. The Principal monthly report was read, received and filed. Moved by Mr. Crabbe, sec. by Mr. Elliott, and carried, that Miss McMahon be appointed assistant in St. David's Ward School, to 31st Dec., at the rate of \$100.00 per annum. Moved by Mr. Swanson, sec. by Mr. Crabbe, and carried, that the Contingent Committee purchase a "Paramount" stove for the Central School as an experiment in economical and efficient heating. The Contingent Committee was instructed to advertise for tenders for the erection of a Schoolhouse in St. Andrews, building to be finished by 1st May 1872.

TOWN COUNCIL.—A meeting was held on Wednesday, 6th inst. Present, the Mayor in the chair, Reeve and Deputy Reeve, Councillors Pasmore, Gardner, Smith, Gordon, Davidson, Sinclair, Debor, Daney, and Mr. Clifford. The minutes of last meeting were read and approved. A voluminous communication from the President of the Northern Gravel Road Company was read, and after a good deal of discussion, ordered to be filed. The Road and Bridge Committee reported the tenders for the grading of Anglesea at, recommending the acceptance of Mr. Brooks' tender. The Report was adopted. A petition for relief from P. O'Brien was read. He was granted 50 lbs of flour per month, during the pleasure of the Council. Summary accounts were ordered to be paid. Grant of \$20 was made to the Battalion Rifle squad, \$10 to the Goderich Artillery and \$10 to the Goderich Rifles.

HORTICULTURAL SOCIETY.—The Regular monthly meeting was held on Tuesday evening, 5th inst. The following judges of the Ladies work were appointed—Mrs. Finlay, Mrs. Hays, and Mr. Edwards. Judges of Vegetables Messrs Edwards, Harrison and Bonnamy. Mr. Robert Walker was appointed one of the judges on flowers and Thomas Hood on fruit. The Secretary to secure two judges in each of these departments from the Ontario Fruit Growers' Association. Messrs Hood, Gingham and Hick were appointed a Committee to have the drill shed whitewashed and prepared for the exhibition. It was agreed that an afternoon and evening exhibition be held. Mr. Saunders to furnish the lights. A Communication was read from Hugh Love Esq. Secy. South Huron Agricultural Society requesting a judge on Fruit and another on implements. The Society appointed Mr. A. M. Ross on Fruit and Mr. P. Adamson on implements.

ABSTRACT ON A WIRE.—Samuel Noble was assigned, before his Honor Judge Brown at Interim Sessions to day (Friday) at 11 a. m., charged with assaulting his wife. Mr. Hays appeared for defendant and asked for adjournment till Tuesday at 11 o'clock on account of the absence of material witnesses. Adjourned.

TOMATO OMELETTE.—Six eggs, a wueglass of four, four ripe tomatoes, pepper and salt to the taste, milk sufficient to mix the four smoothly. Beat the eggs very light, stir in the mixed milk and flour, peel, chop the tomatoes, and add with the pepper and salt. Have a pan with some hot butter, pour in the mixture and fry it. When done it may be lapped half over or not, according to the fancy. Do not turn it.

The Signal is the largest local paper in the Dominion. It is published every day except on Sundays and public holidays.

Teachers' Salaries.

For the Huron Signal.

Wawanosh, 9th Sept. 1871.

Mr. Editor, you will oblige a number of the readers of your paper, and also the Teachers of Common Schools, in the County of Huron, by publishing the following in their interest, and that of School Teachers generally. When a man is imposed upon in any way, he feels inclined to resist and do something for the purpose of showing the fault of the imposer. When a man sees his interests meddled with to his own loss, and that in what light it is looked at as long as it is harmful to the prosperity and success of both parties concerned, he feels annoyed about it, and at once tries to make a reform. The case is bad enough when confined to two persons, but it is a great deal worse when such wholesale robbery is going on in not only the Province of Ontario also. If a person takes away part of another man's living, then that is robbery, though he may do it in a thoughtless way and at the same time suffer loss as well as the person he takes from, then the only modification in the name is that he is a thoughtless robber. Such work has been going on for years with the teachers of Common Schools through the country, until the business is run down so low, that in the spring after a long winter, they come out and long! showing very plainly that there was a pinching and a squeezing that was not very wholesome. This is what gives me the boldness to ask for space in your paper, which is now coming before the people in an enlarged scale, one of the best local papers in the country, and gaining week by week the confidence of the people. As a man who has the interests of the country at heart, who is watching closely the progress of the educational facilities, which are being brought within the reach of the rising generation, as one who is interested in the Teachers of Common Schools of the Province of Ontario, and as one who has an interest in himself, I feel justified in asking the people, especially the Trustees of the County of Huron—should the men and women who have spent a long time in acquiring the needed qualifications to pass the Board of Examination under the New School Act, who have spent a great deal of money, and some of them all they have in acquiring an Education to train up, and fit their children for the activities of life, and at a great risk of health—should they after passing the late examination, and gaining for themselves a Third or Second Class Certificate, after Dr. Ryserson publishing to the world that a Third Class Certificate under the New Act, is better than an old Third—Should they after all their dry hard labor for their advantage, as well as that of the young, consequently that of the country, should they, I say, receive for their work less than the majority of Mechanics in the County, who have the pleasing of one man only, while a teacher has to please a whole community? Oh! how hard that! how humiliating this is! and yet it is a shameful fact. A great number of the Teachers in the country felt how stirring their hearts at a more rapid rate, when so few of the applicants in the Province succeeded in getting a Certificate at the late Examination, because they felt that their salary would be raised, but how they felt discouraged when they knew, as I know, that some of those who passed at the Board, are offering to teach for the small sum of \$300.00 for the coming year? They do it, because some of the Erastus old Trustees say, "no more will be given here than \$300.00 whether a good Teacher, or a bad one is secured," and partly afraid of the gruffness of their managers, and partly because they may lose the school for the time and worse than this have no recourse in themselves as fit for teaching, afraid to say boldly without fear, live men if you want me to teach your children, you must pay me for it! This is not their style; but they will say I would like so much, and poke around in this kind of a way, until some niggardly man will say among themselves while he talks in that way, all right, so there it ends, with fear and trembling he accepts their offer, and they find when it is too late they have made a bad bargain. These kind of Teachers are the robbers, others see that the cheap Teachers get the situations, and they must come down last to the teachers and the Mechanics of our country tell us, they are not satisfied unless they make \$3.00 per week and many \$11.00 and \$12.00. I am a mechanic I know all about the matter, and have conversed with my shopmates on this point, mechanics who mind their business, make from four to five hundred dollars a year. But the Trustees say our hired men, who work harder, and for less money are satisfied and so should Teachers.

THE GREAT FEMALE REMEDY
Job Moses' Periodical Pills
THIS INVALUABLE MEDICINE UNFAILING in the cure of all those painful and dangerous diseases which the female constitution is subject to, regulates all excess and removes all obstructions and a speedy cure can be relied on.
