SIDE TALKS.

By Ruth Cameron.

THAT POWER WHICH CREATES ALL THINGS NEW.

"No man in love can ever forget the visitation of that power in his heart which created all things anew, when a single tone of one voice could make the heart bound and the most trivial circumstance associated with one form is put in the amber of memory; when he became all eyes when one was present and all memory when one was gone."—Emerson.

One surely does not think of Emerson as the prophet of love. And yet I know of no better description of the miracle which befalls the poor and humblest as well as the richest and the greatest, than that one paragraph.

Watching The Little Comedy. I have been spending the spring at a place to which a great many bridal couples come. It is such fun watching them, seeing the pretty trousseau gowns come out, and on some especially grand occasions, the wedding gown; hearing them say with an assumption of matter of factness and yet the tiny hesitation that gives them away: "My husband didn't bring his golf clubs because I don't play," or: "My wife doesn't like to get up very early in the morning."

It is fun just to come in contact with them as they start on this new voyage on unknown seas.

Why All This Ceremony.

Sometimes it has seemed a bit foolish to me that we should have so many ceremonies, so many customs—the trousseau, and the big party that is the wedding, and the honeymoon—to surround anything so simple as the wish of two people to live together. But I realize that it is after all a happy circumstance for it gives a

chance to everyone for once in a lifetime to be important, to be fussed over, to have the center of the stage, to rise for a little while out of the humdrum routine.

Isn't it a happy circumstance, too, that nature planned the continuation of the race to be managed this way and gave us this marvelous adventure of love and marriage to season the daily round of labor and rest?

English Girl Graduate

STUDYING CONDITIONS IN CANADA

WINNIPEG, Man., May 30.—Emily Pinder, a graduate of the experimental farm of Leeds University, is in Winnipeg to begin a year's study of Canadian agricultural methods, with a view to creating a movement to Western Canada of English farm girls, on her return to the British Isles.

"Girls on the farms in all parts of England are intensely interested in Canada. They are seeking an outlet for their energies and would migrate to the dominion in large numbers if only encouraged," Miss Pinder asserted.

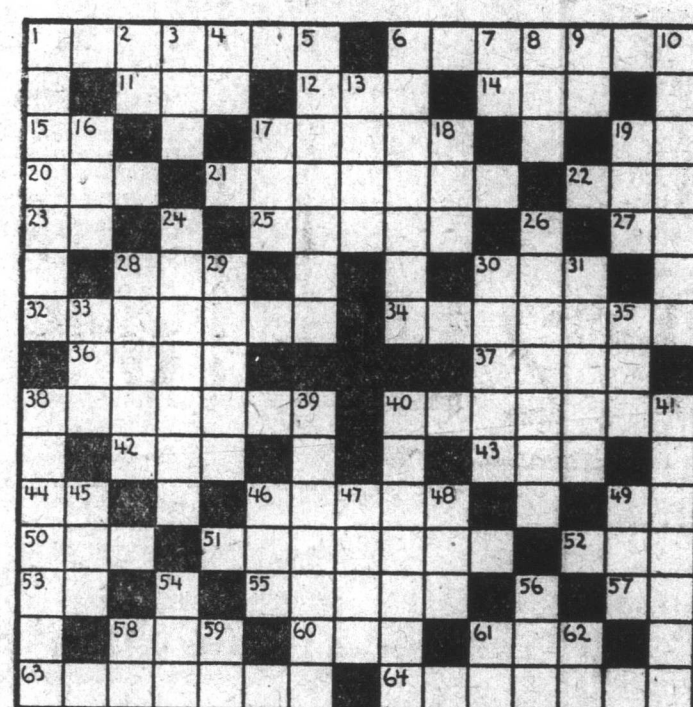

Many of these young women, she declared, had sufficient funds to start farms of their own, and would prove a valuable asset to the development of the Western country.

CONFEDERATION LIFE.

DOING WELL WITH FISH.—At Bay de Verde and vicinity the fishermen are doing fairly well and one man there has already 150 quintals codfish ashore. A number of icebergs are causing anxiety to the fishermen, although no damage, fortunately, has been done to the gear. Up to the present there has been no sign of caplin in the vicinity.

CROSS-WORD PUZZLE

©THE INTERNATIONAL SYNDICATE.

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES
Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

HORIZONTAL

- 1—Entertainer of guests
- 2—Bondage
- 11—Possess as one's property
- 12—Stamina (slang)
- 14—Large
- 15—A parent (abbr.)
- 17—A dart
- 18—A southern State (abbr.)
- 19—Ever
- 21—Doctored
- 22—A beetle
- 23—Printer's unit
- 24—Discernment
- 27—Upon
- 28—Apex
- 30—Call for aid at sea (abbr.)
- 32—Mistakes
- 34—Kin to
- 36—Helps
- 37—One who uses
- 38—Accosted
- 40—Getting the best of
- 42—Medical men (abbr.)
- 43—Aged pullet
- 44—Included in
- 46—Trials
- 48—Accomplish
- 50—Marry
- 51—More touchy
- 52—Bovine animal
- 53—Man's name (familiar)
- 55—In a state of exclusion
- 56—An island on east coast of U. S.
- 58—Southern State (abbr.)
- 59—Before
- 60—Man's name (familiar)
- 62—Representative of the whole (pl.)
- 64—Forbearing to injure

VERTICAL

- 1—Impedes
- 2—Thus
- 3—A number
- 4—Printer's unit
- 5—Broadcasts
- 6—Detective
- 7—College degree (abbr.)
- 8—Strive for supremacy
- 9—For example (Latin—abbr.)
- 10—Longed for
- 12—Periods
- 13—A limb
- 17—Skill
- 19—Very small
- 20—One of baby's words
- 24—Rims
- 25—Srowned before the fire
- 28—Attempted
- 29—Stakes
- 30—Wet mud and snow
- 31—A German mug
- 32—Propeller
- 33—Eagle
- 35—Scowls
- 36—Gowns
- 41—Gaining in size
- 42—Gave food to
- 43—A beverage
- 47—Agitate
- 48—Perceive
- 49—U. S. unit of money (abbr.)
- 54—High mountain peak
- 56—Distant
- 58—Part of verb "to be"
- 59—Aluminum (Chem. Sym.)
- 61—A continent (abbr.)
- 62—A note of the scale

WALT MASON

The doctor comes with acid question concerning what I drink and eat; for I have chronic indigestion, which tortures me, from neck to feet. He scolds me if he finds I've eaten some rich spaghetti from a can, or any bread that's white and wheat, and not composed of tasteless bran. And while he talks I hear him growling with pain, the duplicate of mine, the same disease that keeps me phoning all docs and druggists on the line. How does the doctor put it over, when he enjoys the same disease? How does he make me eat dried clover when I would fain have pies and cheese? The barber says, "Your hair is thinning, my tonic is the stuff you need; all kinds of plaudits it is winning, it's certified and guaranteed. The barren scalp this dose caresses, and if its virtues you enjoy, you'll soon have waving, raven tresses, like that famed lordling, Fauntleroy." I tell the barber to apply it, although I see that he is bald; his scalp requires a kindred diet. If his blonde locks would be recalled. How does the barber put it over? We see him do it every day; can any gent 'twixt here and Dover tell how he makes his tonic pay? The agent comes with books explaining just how to gather wealth untold; he has no slicker, though it's raining; his shoes are patched, his hat is old. He has no store of worldly plunder, he's bleak and shabby, fore and aft, and yet I buy his book and wonder just why I'm falling for his graft.

Curiosities of Hair

Some curious anomalies regarding the hair and skin have been noted by Professor Joseph Barcroft. He tells us that hair is merely skin which has grown in a peculiar way, hardened, and instead of being rubbed away, as happens with the ordinary surface of the skin, sticks out in tubular form. The pigment which colors the hair is not the same as that which colors the skin, for the skin of an Anglo-Saxon, however black his beard, is not negro.

Experiments with a piebald cat showed that though at first glance the skin, shaved of hair, remained particularly colored as the hair, when the places were put under a microscope it revealed that the colored parts were merely the hair roots seen under the skin.

Melanin is the name given to the pigment which colours Negroes or the black cat, and this pigment will also be found when an apple or potato is cut in half and exposed to the air. It is not clear, however, what relation exists between the coloring matter of differently hued animals.

In studying white animals some interesting points arise. There are two sorts of white animals, as in the case of white rabbits (pure white and pigmented eyes) and albinos (which are devoid of pigment or coloring mat-

ter). If one were to cross a pure white rabbit with a pure black, the family in the first generation would all be white, while if a black thoroughbred were crossed with an albino the first generation would be all black.

Trees it Pays to Plant

TRY GROWING WALNUTS.

Aspens are being planted in forests in Scotland with the object of supplying wood in the future for British-made matches. The aspen is one of the poplars, and grows very rapidly, while its wood is ideal for making match-sticks. As a rule the man who plants trees cannot hope to see the fruit of his toil. He is working for his descendants.

But there is one tree which is an exception to this rule. That is the

willow. At the present time there is a great revival in the willow trade, and eighty varieties are in cultivation in this country.

The best is said to be the "repens," or creeping willow, which produces canes almost as tough as wire. For the purpose of making fine basket work these canes are worth about £17 a ton. The "repens" grows wild on the sand dunes of the Somerset coast.

For Baskets and Hurdles.

The ordinary willow, which grows in withy beds, gives a good profit to the grower. The canes grow ten or twelve feet in a year, and a bed goes on bearing for ten years before it needs replanting. The rods are peeled before use, and the smaller are sold for basket work. The larger are used for making hurdles.

Even the cricket-bat willow grows

so quickly that it produces good timber within fifteen or twenty years. Why do we not plant more willows? Here is a tree which grows quickly, produces quantities of nuts, and which the wood is extraordinary hard and very ornamental. One black walnut tree sold recently brought its owner £300. It was shipped to New York and cut up into veneer which eventually realized £12,000!

CHEMICALS AND BACTERIA BAN NED.

GENEVA, June 10.

The International Conference in control of traffic in arms to-day outlawed poison gas warfare by adopting the protocol submitted by the United States delegation, prohibiting the use of chemicals and bacteria as weapons.

To bring out hidden loveliness

—a simple method of skin care

COMPLEXION beauty—fresh, radiant skin—is the birthright of every girl and woman. In most cases it but needs bringing out. It is often hidden by unconscious neglect.

Here is a simple method millions of women employ. Most effective of all beauty treatments. You can employ it tonight.

Cleanse regularly

Every night you must remove from the tiny pores the day's accumulation of harmful foreign substance: powder, rouge, dust from the air. If allowed to remain it ages, deadens the skin—often causing eruptions, blackheads.

But in cleansing the skin, beware of harsh methods—soaps that are as harmful to the skin as the dirt they remove.

The correct way

Before retiring, wash carefully with Palmolive Soap. Massage the creamy lather well into the pores. Then rinse. A second time wash and rinse. Finally, apply a bit of good cold cream—if skin is dry. That is all.

A natural, mild cleanser

Palmolive is the choice of millions of women for this treatment. Because it is a scientifically perfect blend of natural oils—from the palm, coconut and olive trees. No others are used. These—and nothing else—give Nature's green color to Palmolive Soap.

It is most unwise, in this treatment, to risk using soaps of which little is known. And Palmolive costs so little that you can well afford it for the bath—letting it do for your whole body what it does for the complexion.

Obtain a cake today. Tonight start following this method. In one week you will see the improvement—others will mention it to you.
