#### THE EXHIBITION.

The Nineteenth Annual Exhibition of the British Columbia Agricultural and Industrial Association opens to-day. It will be, from what we have heard of it, and what it ought to be, superior to any Exhibition held in this city heretofore. These yearly exhibitions of the products of the different industries of the Province are intended to de monstrate the progress it is making in the useful arts. And they do this very effectively and very satisfactorily. If the Exhibition which is to be opened to-day is compared with one held three, four, five or six years ago, those who make the comparison cannot but be struck with the very great progress which the Province has made in all its industries. great advances it is continually making. The British Columbian is continually meeting people who are telling him that the Province is not going ahead, that it is not in a better position than it was at a certain period some years ago, which his informant tells him was British Columbia's golden age. ## A STATESMAN'S UTTERANCE.

Sir Charles Hibbert Tupper delivered happy speech at the opening of the Toronto Exhibition. He showed that he believes in Canada and is confident of its future. Its prosperity, he asserted, does not depend upon any political party. The people have, under Providence, their own destiny in their own hands. Among other things well worth hearing, he said :

I believe your exhibition is of great national importance. I think, of course, it is a great thing that you should bring together the exhibits of the different industries and of agriculture and excite a worthy rivalry in that regard, but above that I see that in your wisdom you have asked men, some of them prominent, some of them humble, like myself, although holding a responsible position in the Government of this country, to be present to give them an oppor unity of meeting the intelligent men that ongregate within your gates on these occaions to say something to stir up the nation al pride. In this you are doing a great thing for Canada, and it will be my duty to-day, as it is my pleasure, to say one or two words ordinary, it is true, but, nevertheless, to speak for those who remain silent, who have not my opportunity. I would refer to the spirit of ope which is abroad in this country to day. We have had good news from the West, and ing it almost as soon as those great territories, and, taking one thing with another, as I have done, travelling through the Provinces and meeting public and business men, I be-lieve that the day of doubt has passed from this land of ours. These are the words not of a partisan politician, but of a statesman to whom his country is more than his party, and who takes a proad view of the conditions on which the welfare of the Dominion depends. We are much mistaken in Sir Charles H. Tupper if he does not, as he grows older, prove something more and something a great deal better than a mere party politician.

A few days ago illustrations were given in these columns of the process of scandal making. Again the subject introduces itself. The Sault canal was opened on Monday. By the Opposition a great deal of difficulty is experienced in attaching a scandal to that great and important work. But the partisans are not to be deprived of the pleasure or advantage of insinuating that there is something wrong somewhere. The Montreal Witness does the job this time by charging extravagance, or worse. It says-"The es timates of the work as originally introduced to Parliament were under a million of dollars; the cost of the finished work, with all statement open? There are three millions missing. The Grits, here and elsewhere, are continually accusing the Government of bribing the people with their own money. ## REVELSTOKE,

(From the Inland Sentinel.)

The party composed of members of the British Columbia Board of Trade, of Victoria, who are making a tour through Kootenay, arrived here on Monday, September 9, and left on the same same day on the Nak-

usp for Rossland. A meeting was arranged in the afternoon, in the Victoria hotel, when several matters of vital importance to Revelstoke and vicinity were discussed, among them being the matter of the C. P. R. running a store car in opposition to the merchants here, and also the one of the C.P.R. putting a new bridge across the Columbia that would prevent navigation-a draw bridge being what is wanted. Colonel Prior and R. Cassidy both spoke on the subjects, and all the members professed themselves to be thoroughly in sympathy with the matters in question. In the party that left on the Nakusp are the president, D. R. Ker; vice president, G. Leiser; expresident, A. C. Flumerfelt; J. Piercy, B. W. Pierce, G. A. Kirk, M. Robertson,

#### MIDWAY. (From the Advance.)

The trial shipment of ore from the Smuggler claim at Fairview, recently sent to the Tacoma smelter, gave after the expenses for smelting had been deducted, a net return of \$143 70. Much free gold is met with in the ore at present and some of the specimens are

of a peculiarly rich character. George Cook located last month a claim in the Wellington camp, the Jim, which prom-ises one day to develop into a valuable mine. The ore is a copper sulphate and is supposed will assay between \$25 and \$30 in gold. The ledge is known to be 50 feet wide.

S. S. Fowler, M. E , has been engaged in laying out the site for the smelter at Midway.
Mr. Finch, of Spokane, prominently

known in mining circles, visited several of the principal properties in Boundary last week. His expectations, he said, were far exceeded, and he was particularly astonished at the size of the great copper ledges in Greenwood.

The manager of the Stratheyre company at Fairview is awaiting the arrival of shoes, dies and other necessary machinery for the stamp mill before starting the mill on a run of ore which is awaiting treatment. The severe frost on Thursday and Friday

nights damaged very considerably Mr. Hopper's bean and corn crops.

The proprietors of the Spotted Horse have just completed the third assessment. The

silver goes probably from 12 to 40 ounces to the ton. Another large body of ore has been struck on the ranch of Mr. Learow, Anarchist mountain, and the proprietors, who are try-

ing to ascertain the extent of the deposit, have already stripped the ledge to a width of 50 feet, without having as yet located the walls. It is a large body of hematic ore, similar in character to that found on Kruger mountain, also to the east and west of Boundary creek, the north fork of Kettle river, and those of Trail creek.

#### KAMLOOPS. (From the Inland Sentinel.)

The prospects for the success of the Kamloops fair, to be held during the first week of October, beginning on Wednesday, are very bright. The number of entries will be action regarding the resolution passed at the large and stockmen, as a general rule, have announced their intention of bringing in their best animals. The horse races will be keenly contested.

Wm. Lewis, who went up to Adams lake prospecting last July with John Hanna, came in this morning and recorded two mineral claims, the Iron Horse and Morning Star, on Adams lake, about six miles from the outlet. They think there is more gold

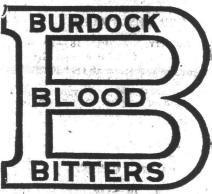

than silver in the rock. Joe Wayee, charged with supplying liquor to two other Indians, pleaded guilty, and was sentenced by the magistrate to three Petries and Johnnie August were arraigned on the charge of killing Felix Thoma on the night of August 31 or September 1. The case was remanded

eight days.

J. M. Kellie, M. P. P., of Revelstoke, was in the city on Thursday, accompanied by T. Hennessey, of Big Bend. Mr. Kellie has big hopes for the Lardeau country, which he predicts will next year attract as much attention as Trail creek does this summer. On the Northern group a large body of ore occurs. The tunnel has run for twelve feet pattern, and handy to the yards, will not in the vein, and the men are still working in ore which runs from 40 to 100 ounces in silver and \$7.50 to \$10 in gold. He estimates the output of all the Kootenay mines this year will reach \$3 000,000. The wagon road to Trout lake makes the mines more accessible than last year. Valleys of good farming land occur along some of the streams, and this when cultivated will be of much assistance to the district.
