is affected to the latter. If the Grand
Trunk company were to follow the example
of the Pennsylvania Railroad company they
would have no occasion to apply to parliament to abolish the scalping profession.
That corporation will pay full value for one
of their own tickets that the purchaser
does not want to use at any of their own
stations. Mr. Hickson is in Ottawa now,
and among the many axes he asks to have
ground by parliament this year, the sus-

water from Chicago to Montreal is 1250 miles, or 147 miles less than the distance of the former city from New York. By the shorter or Canadian route there are 71 miles of canal, while in the other route there are 3684 miles of taxed canal navigation. It would be natural to expect under these advantages a great increase in the grain shipping trade from Montreal next summer: But many things remain yet for Canadians to do if they wish to get the full benfit of their water advantages, and among those things are the building of elevators at Kingston and Montreal, and the diminution of the port dues at Montreal.

The Egansville Express is shouting for a lawyer. The editor regrets to say that parties from North Hastings, Cumbermere, Rockingham, Rudenell, Barklake, and other townships round Egansville have to go all the way to Pembroke for legal advice when the way to Pembroke for legal advice when they have any fuss about their line fences, or any other trouble. Egansville is not the only growing village in the promising back townships where a young professional might establish himself and "grow up with the country." It may be pretty rough for a while, and lonesome too, after student life in Toronto, but if their hearts are in their work and they stick to it their husiness. A Coloured Thief is Maimed for Life in Escaping their line fences, which sooner or later must be made straight. The young dector, too, has a splendid chance, and if any of the students would only take a trip into the country and get the experience of some of the "old doctors" they would be encouraged to try it. These back townships must grow, and this city could easily afford a number of doctors and lawyers to make them happy. There will be a good look out in the north west when the Pacific railway is built, and the first bird on the new ground will get the first bord on the mew ground will get the first bord on the new ground will get the first bord on the new ground will get the first bord to the first bird on the new ground will get the first worm fence to straighten.

seem to meet with much favor among the stalwarts composing the police body, and petitions are being sent to the commissioners to drop the matter. The men admit that were the council to grant an appropriation of \$5000 or \$10,000 as a sinking fund the scheme might then be feasible enough, but in its present shape it meets with disapprobation in many quarters.

The Brain's News anys "if is not much credit to Canada to see so many seconate of state balls, dimers, and other extravagances in which members of pullament, the circle services are subjected in the capital are so continually indulging in." The Ottaw papers appear to wallow in a congenial element when describing the diresses worn by the ladits at all these gatherings, and the millinery reporter forwards as blank circular to the invited fair eness saking them to fill in a description of their intended tollets. Once a dress appears in this column of fashion it has a black mark put upon it, and it must either be "done over "or otherwise dispuised in order to be presentable a second time. and among the many axes he asks to have ground by parliament this year, the suspension of trafficking in railroad tickets is one. But it is not likely that that body will answer this unjust prayer.

While Canada at present cannot pretend to do much in the carrying by rail of western grain to the seaboard, yet, with the enlarged canals, she can confidently look forward to an increased volume of produce seeking Montreal by her inland waterways. It is expected the enlargement of the Welland canal will be completed in July next, allowing thereafter the passage of vessels carrying 60,000 bushels. The distance by water from Chicago to Montreal is 1250 miles,

It is to be hoped that the movement now on foot toward the restoration to fellowship of the Bond street congregational church with its own and other denominations will prove successful. Charity and forbearance are among the first necessaries in reaching so sensible a conclusion.

IT IS NOT unlikely that the Pullman pa ace car company will be forced, in face of the efforts being made in some of the states, to reduce their exerbitant rates of fare. A bill has been introduced in the Illinois legislature to compel the company to "come down" in their fares, as far as that state is concerned, and some of the Chicago papers aver that it will certainly pass.
