Now the Stock Went Down-The Re-Bound-The MONTREAL, March 11.—The Witness of to-night says :- "The drop in telegraph stock of Thursday is blamed by some opera tors on the Canada Mutual for the action taken to appoint a sequestrator to the Montreal Telegraph company. Whatever may have been the reasons for the action, there cannot have been a great deal of damage done, as but few shares of the stock were sold at the lower figures and to-day's market finds the stock selling up fully three per cent. over the lowest point reached and caused by the reported action of Mr. Longtin. Whether brokers originally had anything to do with the affair or not is not easy to decide, but a favored few were quite well aware days before it became public news, and improved upon their knowledge to go short the stock several points. Officers of the Montreal company say they believe that there is no reason to fear any difficulty from this suit, and expect to get sufficient legislation at Ottawa to protect the legitimate shareholders from attacks of isolated shareholders, who they say ar-liable to lend themselves to stock brokers,

The Canada Mutual having been charged The Canada Mutual having been charged with having a finger in the writ of quo-warranto, taken, with the name of the attorney general, by Mr. Longtin, our reporter called upon Mr. Hosmer, president of the Canada Mutual. He denied very emphatically that his company had anything to do with it. He pointed out that it was rather in the interest of the Canada Mutual that the bargain should continue as it present exists be should continue as it present exists be tween the Dominion, Montreal, and Great Northwestern concerns, inasmuch as the Northwestern concerns, mashined by the component canada Mutual thus has only one opponent canada Mutual thus has only o in its race for telegraph business. If the bargain lapsed, then the Dominion and Montreal companies would be relegated to their old business, and the Canada Mutual would be opposed by two companies catering for public business instead of one as at

Whether the legislation sought is likely to be obtained from parliament or not is a matter for conjecture; but it appears that matter for conjecture; but it appears that a petition is being circulated among the shareholders of the Montreal company asking that government shall give its sanction to the bargain as it now exists. It is said that most of the shareholders will sign the document, and that it will have considerable weight with the authorities. Rumor also says that a contrary position was printed yesterday, and that the shareholders dissatisfied with the arrangement will sign it largely. Should this be the case, it is likely that the government will leave the matter for the courts to decide rather than interfere at this be the case, it is likely that the government will leave the matter for the courts to decide rather than interfere at all. The appeal taken against Judge Rainer. The appeal taken against Judge Rain ville's judgment is really the key to the position. The judgment on that appeal is not likely to be given for several months yet, as the case has still to be argued. It remains to be seen whether or not parliament will legislate upon a case while it is before the courts. It likely will not.

Every Canadian feels a national pride and heritage in the Falls and their celebrity. Heretofore there has been very little inducement for the visitor to linger after his hurried survey of the beauties of the place; and for the pic-nic party there is no accommodation whatever; if a rainstorm overtakes them, they must just stay out in it and get drenched. A pavilion with accommodation for excursionists, similar for instance to that furnished at Port Stanley, would be a great convenience. A free giving trouble to the state. public library and reading room in Prospect park would be a very attractive public feature to the student and literary men of would contribute one cent towards this, it would be a beginning, and teach the young idea how to shoot in a good way. And if the Falls could have a coffee house to rival the St. Lawrence of Toronto, under th same patronage, there would be another great advance made in her attractions. Anr if we could see a church spire on "ou side" in view of the Falls, who is there would not enjoy and commend the change and attend the services. C. C.

Some of his friends think they see signs of weakening of Senator Edmunds' determination not to accept the United States supreme court judgeship. In the event of his declination, all indications point to the omination of Blachford. Gen. Wm. Wright, the well-known en-

CORNWALL, March 11.—A man named Alexander has been making things lively here for some time past. He was a buyer of potatoes, which he shipped to the American market. By making sundry representations of a plausible nature, he induced A. J. Maley of the American house to endorse for him to the tune of \$5 °0. When the note matured it was protested as neither Alexander nor his money was here. The case was put in the hands of a firm of Montreal solicitors, and within twenty-four hours Alexander was nabbed on a writ of capais Alexander was nabbed on a writ of capais by a bailiff at Coteau Landing.
