JAMES EPPS & CO.,

INVALIDS' HOTEL SURGICAL

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

become acquainted with them, show them our institutions, and samiliarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculeus, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable aearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and forctell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places carried. And so in all departments of modern science, what is required is the knowledge of certain signs. From these scientists deduce accurate conclusions regardless of distance. So, also, in medical science, diseases have certain unmistakable of stems of a course of the stems of a course of the stems.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgme his whole time to the study and investigation of a certain of diseases than he who attempts to treat every ill to which fiesh is den, in all ages of the world, who have become famous, have

OUR FIELD OF SUCCESS.

BRIGHT'S DISEASE, DIABETES, and indred maladies, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, who can, therefore, generally be successfully treated at their nomes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and world-famed World's Dispensary and invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the exact nature of each case, and, hence, have been successful in nicely adapting their remedies for the oure of each individual case.

These deficate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to accertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive influence in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to oure these diseases, although possessing very superior remedies, knowing full well from are extensive experience that the only safe and successful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease application of our patient.

To this wise course of action we attribute the

WONDERFUL
To this wise course of action we attribute the marvelous success attained by our specialists in matterious devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the kidneys and bladder. The treatment of diseases of the uninary organs, having mostituted a leading branch of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps. DISEASES. STRICTURES AND URINARY FIS-TULÆ.—Hundreds of cases of the worst form of strictures, many of the

Epileptic Convulsions, or Fits, Paralysis, or Palsy, Locomotor Ataxia, St. Vitus's Bance, Insounda, or inability to sleep, and threatend insunity, Nervous Bebillity, arising from overstudy, excesses, and

DISEASES OF

DELICATE

DISEASES.

We offer no apology for devoting so much attention to this neglected class of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble profession fo which we belong. Many who suffer from these terrible on doing good and alleviating suffering, should shin such cases, we cannot imagine. Why any one should consider it of therwise we cannot understand; and yet of all the other maladies which we cannot understand; and yet of all the other maladies which there is probably none about which playsicians in general practice know so little.

We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

Most of these cases can be treated by us when GURED AT HOME, at a distance just as well as if the

in person.
Our Complete and Illustrated Treatise (168 pages) on these subjects is sent to any address on receipt of ten cents in stamps, Our Complete and Illustrated Treatise (his places of the places of the any address on receipt of the nents in stamps.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-special ists. Largo Stones are safely removed from the lists. Largo Stones are safely removed from the mout, thus avoiding the great danger of cutting out, thus avoiding the great danger of cutting ones. They also straighten cross-eyes and insert artificial ones when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our imperation, whereby the great danger of cutting operations in these cases is avoided.

Especially hus the success of our improved operations for Variations. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female general resulting in Barrenness, or Sterility, and the cure of which, and complete Treatise on any one of the solution painless operation, removes this commonest of imeliancents to the bearing of offspring.
