The Bridgetown public school was the scene of a very grave act of insubordination on Monday last.

Several of our contemporaries, in copying the forecast of weather published in our columns by Dr. S. C. Fryer state that we said the D' prediction was incorrect, as what we did say was that several of his predictions have proved correct. The Dr. does not claim any means to be an infallible weather prophet.

—A random correspondent of the Monitor reports the discovery of gold in his locality. He says:— There is much excitement over the discovery of a new gold mine, located on the exploring Indian, who has been so successful in the past, found a lead which runs directly under the Methodist Meeting House. It is thought to be very rich in deposit. Several claims have been taken up. The first was by Mr. Moore; E. M. Davidson; and the MacLennans have also secured claims.

—The Olive Branch Branch of the Sons of Temperance celebrated its 25th anniversary on Monday evening. A large number of members and invited guests were present as many as the hall could comfortably accommodate.

—The evening's entertainment was very pleasant. First on the programme were the gymnastic exercises, in which all present took a satisfactory part. Beans, bread, cake, pie, coffee, tea, apples, oranges, etc., were all thoroughly discussed, the question of their excellence being decided in the affirmative by a unanimous vote.

—Next came the musical and literary exercises. When the names of expectant participants were called, it was discovered that a few owing to their serious execution of the first part of the programme, were too late for the use of the hall.

—Nevertheless, resistances, speeches, diets, songs were forthcoming in abundance, until it was fully time for all impatient people to sing "Good Night, Good Night." It was then that the Olive Branch of Peace.
