CUT-WORMS DESTROY BEANS IN ALBERT

Hopewell Hill, June 22-Not for many years have cut-worms been so numerous and destructive as they are this season. Many fields of beans, which appear to be their favored beans are not only cut off after they come up, but the worms operate underground, cutting through the stock as soon as it grows. The bean crop on account of these depredations, will likely be very light. Peas and other plants have also suffered, but not to the extent of the beans.
