

Seed and other Catalogues.

W. A. BURPEE'S catalogue of high class land and water fowls has reached us. It is neatly got up and very full. His address is Philadelphia.

J. & J. H. GILGORY, of Massachusetts, have issued their annual seed catalogue for 1876. It is a well illustrated pamphlet of 52 pages, and contains a large amount of useful information.

J. R. V. HAWKINS' fourth "Annual" is also to hand replete as usual with invaluable hints in every branch of horticulture.

GEO. LESLIE AND SONS, Toronto Nurseries, issue an excellent catalogue of about 70 pages, embracing everything in their line, and in great variety.

VANDERHILT BROS., of New York, publish this year a very superior number. It is well worth perusal.

L. R. CASE'S, Richmond, Indiana, catalogue is one of the best illustrated that has yet reached us.

HOWLY & CO., Boston, issue a 90 page list of all kinds of garden and vegetable seeds—well illustrated.

J. A. SIMMERS' (Toronto) Catalogue for 1876, is one of the best that has yet reached us. It is beautifully illustrated, and contains, besides a full list of seeds, fruits, &c., some most valuable hints for the general cultivator.

HYPOPHOSPHITES.—An article called Fellows' Hypophosphites has been advertised in the Pioneer for several months, but we gave it little thought, except to collect the bill, until an instance of its remarkable effects came under our observation. A few years ago symptoms of consumption exhibited themselves in the case of S-K-, Jr., Esq., of Calais, who belongs to a family predisposed to the disease. His friends became alarmed at the progress of his malady, and realizing the chances as against him, he began to take Fellows' Hypophosphites. Instead of growing worse his health improved, and he now weighs fifty pounds more than he did before he began to take the syrup. We saw him last week, the picture of health, tipping the scales at two hundred avoirdupois. We have no interest in recommending Hypophosphites, except to benefit the sick and afflicted.—Arostook Pioneer.

YOUNGVILLE.—We cannot recommend rape for feeding milch cows.

C. H.—The wart-like sores you speak of are probably the result of irritation produced by feeding some inferior kind of hay or straw; barley straw frequently induces the trouble. We would recommend you to remove with the knife those that have only a slight attachment to the skin, and afterwards dress the parts with carbolic lotion, one part carbolic acid to forty parts water.

R. A. L., of South Haven, Michigan, writes, "If your agricultural population are represented by the CANADA FARMER, Ontario must be on the high road to prosperity, for most certainly we do not have in the States its superior, in all that constitutes a representative of the local farming interests. Each department of the paper shows careful labor, and earnest devotion to its claims. But few of the intelligent workmen, in the field or shop, can afford to lose the vast amount of useful information each number of the FARMER so cheaply offers them."

MANUFACTURE OF COCOA.—We will now give an account of the process adopted by Messrs. James Epps & Co., Homoeopathic Chemists, and manufacturers of dietetic articles, at their works in the Euston Road, London.—See article in Cassell's Household Guide.

EPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctor's bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack, wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. Made simply with boiling water or milk.—Each packet is labelled—"JAMES EPPS & CO., Homoeopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly; Works, Euston Road and Camden Town, London."
