

come a nation of commercial bankrupts in less than twelve months. And what would signify the amount of revenue that would accrue to government, if it were not for the large amount of foreign goods that are annually consumed by the agricultural classes? The amount collected from other classes, if they had not farmers to sustain them, would be comparatively insignificant, and would not be sufficient to maintain the national credit of the province a single month. Then the farmers above all other men should be educated, and as the routine of their operations on a farm are practical, and require a large amount of skill, and likewise science, to ward off the evils that so frequently prove disastrous to the crops, so the education which is imparted to the youth of our land, who aspire to this honorable profession, should be both practical and scientific, and especially of that character that would qualify them to perform the very important and responsible duties that they may be required to execute as farmers and statesmen.

We cannot yet find room either for our Agricultural Intelligence or our Horticultural Department.

INTERESTING GEOLOGICAL DISCOVERY.—Remains of a Thecodont Saurian have been found in one of the recently opened Coal Mines in the County of Pictou. A full description of these will be given in our next number.

### AN INDISPENSABLE SCHOOL-BOOK.

Co's Drawing Cards, Drawing Paper, Drawing Pencils, etc., etc.

All of the above are offered on the lowest terms. A liberal discount to the trade.

### SECOND EDITION—PRICE 1s. 10jd. REID'S SCHOOL GEOGRAPHY FOR BRITISH AMERICA.

THE author solicits the attention of School Commissioners, Teachers, &c., to this work. He has prepared it with much care, with the view of supplying an acknowledged want—viz.: a School-Book, which, along with the General Principles of Geography, and the Geography of the great divisions and countries of the world, shall give full information on BRITISH AMERICA, the UNITED KINGDOM, and the UNITED STATES. One fifth of the work is devoted to British America, including ten pages on Canada, seven on Nova Scotia, and fourteen on Newfoundland, Prince Edward Island, and the general features of British America.

Some such work is considered an educational necessity in every country. As a Teacher, the author found the want of such a book, and has now used it for two years, as a text-book for his own classes, with great advantage. It has also been introduced in other Schools. As it supplies (which no other single work does) the leading geographical matter essential for the Teacher's work in British America, whatever method of teaching be adopted, he has published it at his own risk, believing that it may prove generally useful, and relying on support from all who are interested in the improvement of Education in these Provinces.

#### OPINIONS OF THE PRESS.

The first edition was a vast improvement on what we previously had.—The present one embraces a larger amount of information, and much new matter not before published in any similar work.—*Sen.*

— Contains a greater amount of correct information relative to the American Continent in general and the British Provinces in particular, than we ever before recollect to have met with in any similar work.—*Antigonish Courier.*

— This most useful School-book. It will supply a long felt want amongst the educationists of this Province.—*Morning Chronicle.*

Affects our hearty approval.—*Western News.*

Deserving of the thanks of this community.—*Recorder.*

The School Geography for Nova Scotia.—*Yarmouth Tribune.*

— Will be universally adopted in the Schools of this Province.—*Morning Journal.*

— A book of facts and principles,—containing just the things which are required in a text-book for general use.—*Christian Messenger.*

See also *Express, Wesleyan, Cape Breton News, Liverpool Transcript, &c.*

### GAMMELL and TUPPER,
