SECOND EDITION.

Cæsar's Bellum Gallicum,

BOOKS I. and II.

By SAMUEL WOODS, M.A., London Collegiate Institute.

1. Accuracy and Completeness of Vocabulary; every word, and the exact meanings required to translate the work, and no more.
2. Fullness and accuracy of Grammatical References, and special attention to the construction of the Subjunctive Mood and of Oblique Narration.
3. Clearness and Neatness of Type.
4. An Excursus on the Roman Army in the time of Cæsar, a most complete Index of Proper and Geographical Names, and carefully prepared articles on Archæological terms necessary in understanding the work.
5. Very full Notes, in which the Technicalities of Oblique Narration are avoided as much as possible, and neatness of the English translation chiefly aimed at.
6. In Book II. the References to Bradley's Arnold are very full.
7. The new and unique idea of a carefully written exercise on each chapter, in which the Latin words necessary for the translation are found in the chapter. Masters know the absolute need of such exercises on Latin prose, and these will be found a most accurate test of the pupil's skill in understanding the text.

Price - 75 Cents.

In two respects at least Woods' Cæsar's Bellum Gallicum, surpasses any Canadian edition of Cæsar. The sentences at the end of each chapter for translation into Latin meet a long-felt want, and we have in this what we have not had for some time in Canadian editions of Cæsar, one free from confused typographical errors.

IMPORTANT TO MATHEMATICAL MASTERS IN CANADA.

Plan of Hamblin Smith's Editions of Euclid recently approved by Special Board for Mathematics at Cambridge.

The following is an extract from a Report issued by a Special Board for Mathematics on May 10, 1887. (See *Cambridge University Reporter* of May 31, 1887.)

"The majority of the Board are of opinion that the rigid adherence to Euclid's text is prejudicial to the interests of education, and that greater freedom in the method of teaching Geometry is desirable. As it appears that this greater freedom cannot be attained while a knowledge of Euclid's text is insisted upon in the Examinations of the University, and consider that such alterations should be made in the regulations of the Examinations as to admit other proofs besides those of Euclid, while following his general sequence of propositions, so that no proof of any proposition occurring in Euclid should be accepted, in which a subsequent proposition in Euclid's order is assumed."

The Board gives effect to this view by proposing a change in the regulations for the Previous Examination which will, if it is approved by the Senate, enact that "the actual proofs of propositions as given in Euclid will not be required, but no proof of any proposition occurring in Euclid will be admitted in which use is made of any proposition which in Euclid's order occurs subsequently."

This determination to maintain Euclid's order, and to allow any methods of proof consistent with that order, is in exact accordance with the plan and execution of my edition of Euclid's Elements. J. HAMBLIN SMITH.
