

# Wood-Working Machinery

—FOR—

Furniture and Cabinet Makers,  
Sash, Door and Blind Shops,  
Carpenters and Builders, Etc.

Pattern Shops,  
Planing Mills,  
Carpenters and Builders, Etc.

\*Sheet No. 3 A.

**Our No. 156 Cabinet Planer.**

(Capacity, 24 to 42 inches wide and 7 inches thick.) Is noted for the smoothness of its work—it equals a hand plane—no marks from the knives are left on the surface of the board as with other machines. Our Patent Sectional Clamp Bearings have enabled us to accomplish this.

\*Sheet No. 8 N.

**No. 202 Band Rip and Edging Saw.**

**CAUSE.**—An automatically moving chain in the table.

**EFFECT.**—Edges a board with as fine precision as a circular edging saw.

\*Sheet No. 5-A.

**No. 2 Centennial Surfacer.**

For all kinds of light planing in jobbing shops. There are more of these No. 2 machines in use than any other planer in the world. Capacity, 16, 20 and 24 inches wide by 6 inches thick.

\*Sheet No. 4-M.

**Our No. 50 Band Scroll Saw.**

Will run at twice the speed of any other band saw made. It will run a thinner gauge blade without danger of breaking. That means larger output and finer quality. Solid lower wheel. Patent knife. edge strain.

\*Sheet No. 1 G.

**No. 62 Universal Wood-Worker.**

So great is the variety of work done on this machine that it is entitled to the name "Universal." It will plane straight or tapering, out of wind, joint, rabbet, gain, chamfer, bore, etc. Almost anything can be done on it. Its capacity is limited only by the skill of the operator.

\*Sheet No. 1 U.

**Victor Wood Lathes.**

Our wood turning lathes, either single or double, with or without shears, are used all over the world by pattern makers, colleges, manual training schools and a multitude of shops, where turning is required.

\*For large illustration and complete description of any of the above, write for sheet number.

Our catalogue will give you complete information of over 300 different tools for wood-workers. Write for it. SENT FREE.
