

Information to the
public under
Article 9

In addition to items (1) to (4) above:

(9) The people who may be affected by an industrial accident.

Preventive measures
under Article 6

In addition to items (4) to (9) above, more detailed versions of the descriptions and assessments set out in items (1) to (3) will be needed for preventive measures. In addition to those descriptions and assessments, the following matters should also be covered:

(10) The conditions and quantities in which hazardous materials are handled;

(11) A list of the scenarios for the types of industrial accidents with serious effects, to include examples covering the full range of incident size and the possibility of effects from adjacent activities;

(12) For each scenario, a description of the events which could initiate an industrial accident and the steps whereby it could escalate;

(13) An assessment, at least in general terms, of the likelihood of each step occurring, taking into account the arrangements in (14);

(14) A description of the preventive measures in terms of both equipment and procedures designed to minimize the likelihood of each step occurring;

(15) An assessment of the effects that deviations from normal operating conditions could have, and the consequent arrangements for safe shut-down of the hazardous activity or any part thereof in an emergency, and of the need for staff training to ensure that potentially serious deviations are recognized at an early stage and appropriate action taken;

(16) An assessment of the extent to which modifications, repair work and maintenance work on the hazardous activity could place the control measures at risk, and the consequent arrangements to ensure that control is maintained.
