

- Southeast First National Bank of Miami is operating a gateway to home banking services over Knight Ridder's Viewtron service in South Florida. More than 20 major financial institutions are providing information for the system, called VideoFinancial services. In addition to local advertising, educational courses, real estate listings, food and entertainment information, games and shopping, Viewtron customers can pay bills, monitor accounts, make transactions, calculate mortgage rates and get credit and loan approval.

- One of the most advanced financial packages for the banking and investment community is Marketfax. Developed by Faxtel Information Systems Ltd. of Toronto, Marketfax offers up-to-the-minute stock market information and can create colour charts for 6,000 listed stocks and commodities on the New York, Toronto, American, Vancouver and Chicago exchanges. For stock and security analysis, there are eight indicator lines to overlay price and volume charts. Brokers and investors spot early-warning signals using high, low, close and volume figures for 100-day periods and special stock filter programs which display overbought and oversold stocks.
