The *ninth* and *eleventh* editions of this work have been much enlarged and improved. Exercises adapted to the rules have, in many instances, been copiously supplied. In particular, the exercises in parsing have not only been very considerably augmented; they have also been moulded into a new form and arrangement, which the author hopes will facilitate to young persons the acquisition of this fundamental part of grammatical knowledge.

An Abridgement must necessarily be concise, and it will in some points be obscure. Those teachers, therefore, who do not make use of the author's larger grammar, in their schools, will find an advantage by consulting it themselves. Many of the rules and positions are, in that work, supported and illustrated by particular disquisitions; and the connection of the whole system is clearly exhibited. The *sixteenth* edition of the *duodecimo* Grammar has, in these respects, received considerable improvements. The Grammar and Exercises in two volumes *octavo*, may be consulted with still greater advantage.
