

FAMOUS PLAY AT THE IMPERIAL

"The Lion and the Mouse" in Vivid Portrayal Attracts Big Crowds—The Prince at Quebec

Charles Klein's famous stage production "The Lion and the Mouse" attracted big business to Imperial Theatre yesterday and proved a very pleasing attraction. The theme is fascinating and interesting, and the picture filled with dramatic situations and swift in action. It is the story of the master financial mind and power of the universe brought to

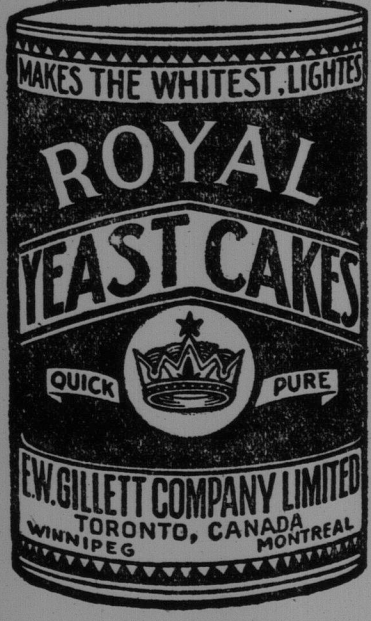

den party at the Royal Canadian Yacht Club. There he laid the cornerstone of the new building to take the place of the club house destroyed by fire some years ago. His Royal Highness thoroughly enjoyed the short sail on Lake Ontario and Toronto harbor, to and from the club's quarters. In addition to the addresses presented to the Prince by the province of Ontario, the city of Toronto and the Canadian National Exhibition—which was formally opened before a crowd of 60,000 people—there were numerous other addresses from smaller bodies, including the Canadian Club, Welsh and Scottish societies, Daughters of the Empire and other bodies. Paying Visit to Montreal. It is announced tonight that the Prince has adopted a change in his programme, whereby he can make a flying visit to Montreal on September 2, in addition to his tour of Montreal, as per original itinerary, in October.

SOME INFORMAL FEATURES IN THE PRINCE'S WELCOME

Small Boy in Bathing Suit Among Thousands Who Shook Hands at Public Reception—Out of His Berth to Speak at Smith's Falls

Toronto, Aug. 25.—From out among the many incidents of this day—probably the busiest that Edward Albert has spent since the inception of the present tour—stands out boldly this fact, that his royal highness is not only a soldier prince, and a fighting soldier at that, but that he is also intensely democratic and most lovably human. Of the half million population of this city, probably two hundred and fifty thousand today have seen the prince, or at least had a glimpse of him. Many of these had the pleasure of shaking hands with him, a few were fortunate enough to grasp the hand of the coming king. These few included all classes of persons, from a score or more of belted knights to a little barefoot boy, clad in a bathing suit, who mixed up with the throng at the public reception in the city hall tonight. The prince, however, did not speak to the two veterans and made sure of their comfort. In Captain's Uniform. The state dinner at Government House tonight, followed by a small dance, was the concluding feature of a strenuous day for the heir to the throne. It started soon after 10 in the morning, when the royal train arrived. His royal highness immediately hit a responsive chord in this city of sixty thousand war veterans—mostly army veterans—when he appeared for the first time on this side of the water, in military uniform, as a he served in Flanders, side by side with the Fighting Canadians. Up to this time he had worn his naval uniform almost exclusively at public functions. He is entitled, of course, to wear a colonel's uniform, holding that rank in several regiments. From that hour, Toronto's tumultuous welcome grew, until in front of the city hall tonight, there was a near riot, as the police tried to control the crowds, who crushed and crowded for an opportunity to get into the public reception. The time was limited, however, and less than three thousand were able to meet the prince, but the three thousand was as representative a crowd of citizens as ever greeted an heir to the throne. Between the two entirely democratic functions this afternoon, the opening and inspection of the Canadian National Exhibition and the public levee at the City Hall, the Prince managed to sandwich in a more exclusive society event—a

den party at the Royal Canadian Yacht Club. There he laid the cornerstone of the new building to take the place of the club house destroyed by fire some years ago. His Royal Highness thoroughly

RETURNED SOLDIER JOINS OAK HALL STAFF. Oak Hall have made another addition to their staff in the person of Mr. Gordon A. Vail, a returned soldier recently back from the front. Mr. Vail left Oak Hall in 1917 and enlisted with the 9th Siege Battery, he trained and went to England with this battery, but after reaching there he transferred to the 10th Siege Battery in order to get to the front quicker. Mr. Vail went through all the active engagements with this battery from the early days of 1918 right up to the very end, leaving France in April, 1919. He returned to Canada a short time ago and was heartily welcomed back to the selling staff of Oak Hall, where he is now holding a position in the men's hat section.

Airmen Kill Bandit. Maria, Texas, Aug. 25.—American aviators made Jesus Renteria, bandit leader, pay in full for his treatment of Lieutenants Peterson and Davis, held for ransom by the Mexican, when Lieut. R. H. Cooper killed Renteria from an airplane, according to a statement today by Major Yancey, commander of the American punitive expedition.

She came down to breakfast very late, and her mother scanned her severely. "Did that young man kiss you last night?" she asked. "Now, mother," said the sweet young thing, blushing "do you suppose he came all the way from Great Lakes to hear me sing?"

Winnipeg, Aug. 25.—At the annual meeting, this evening, of the South Winnipeg Liberal Conservative Association, Hon. Robert Rogers made a forceful address on the present parliamentary situation in Canada as he sees it and announced the formation of a national committee representative of Liberal-Conservatives throughout the Dominion for organization purposes.

U. S. NAVY PLANS

PACIFIC FLIGHT

Washington, Aug. 26.—The United States navy, having been the first to send a flying machine across the Atlantic, covets the same honors on the Pacific. Commander Read, who navigated the NC-4 from Rockaway to Plymouth, is understood to be preparing plans for the crossing of the Pacific. On account of the great distances between suitable landing places on a direct route, seaplanes undertaking the crossing of the Pacific will probably follow the northern route, along the Alaska coast and the Aleutian Islands to Kamchatka, and thence to Japan and China. The distance from San Francisco to Honolulu is 2,100 miles, and no seaplane yet built is capable of carrying gasoline enough for that distance. The misfortunes that overtook the NC-3 and NC-1 in landing in the open ocean off the Azores show that a seaplane takes great chances in coming down at sea. At the same time, "landings" and "take-offs" have frequently been made with success in the open sea and the navy may attempt the transpacific flight in that way, having the plane refueled at sea from a mother ship.

On account of the great distances between suitable landing places on a direct route, seaplanes undertaking the crossing of the Pacific will probably follow the northern route, along the Alaska coast and the Aleutian Islands to Kamchatka, and thence to Japan and China. The distance from San Francisco to Honolulu is 2,100 miles, and no seaplane yet built is capable of carrying gasoline enough for that distance. The misfortunes that overtook the NC-3 and NC-1 in landing in the open ocean off the Azores show that a seaplane takes great chances in coming down at sea. At the same time, "landings" and "take-offs" have frequently been made with success in the open sea and the navy may attempt the transpacific flight in that way, having the plane refueled at sea from a mother ship.

Washington, Aug. 26.—The United States navy, having been the first to send a flying machine across the Atlantic, covets the same honors on the Pacific. Commander Read, who navigated the NC-4 from Rockaway to Plymouth, is understood to be preparing plans for the crossing of the Pacific.
