Real Economy in Shoe Buying

Many people buy "popular priced" shoes under the impression that they are saving money. Economy? Far from it. Low priced shoes are low-priced because they are made from low-priced materials by low-priced labor. They naturally cannot give the wear of high grade shoes and cost a good deal more by the year.

INVICTUS SHOES

Cost more than mediocre shoes—by the pair—much less by the year. They give more real service from the economy standpoint—plus the comfort and smart appearance distinctive of the finest footwear.

If you do not give your eyes the attention they require now, a little later it may be a matter of accepting what you can get and feeling thankful for that.

If you put on glasses as soon as your eyes need them, you will preserve your sight, for, by giving your eyes the help they need just when they need it, you save them from all unnecessary strain.

If your eyes trouble you in any way you will find comfort and relief in a good-fitting pair of glasses.

HALIFAX WOMAN MURDERED—SON-IN-LAW ARRESTED

Halifax, March 8.—The body of Mrs. Margaret Brown, a widow aged fifty years, was found in her room early today by her son George, who had just frightfully crushed and her face mutilated. Her death was due to murderous blows received from a sledge hammer in the hands of some person not definitely known, but supposed to be a young Scotchman, James Murphy, who lived in the house for about six years after coming to Canada from Glasgow and who said to have married her daughter. He had been drinking and had some words with her. Mrs. Brown lived about fifteen minutes after being assaulted. The sledge hammer with which she was killed was found in another room in the house which is at 25 Billy street, with blood and hair upon it. Murphy was arrested.

TOMB OF OSIRIS FOUND BY PROFESSOR NAVILLE

Ruined Sanctuary Built at Time of Pyramids—Digging at Abydos, Egypt, Disclosed Two Large Halls

London, March 9.—Prof. E. Naville, in a letter published in the Times today on excavations of the Egyptian exploration fund at Abydos, expresses the belief that they have found "what Greek authors called the tomb of Osiris, where the head of the god is supposed to be preserved."

The excavations began at the door which Prof. Petrie discovered two years ago. The doorway, Prof. Naville thinks, was the entrance to a passage leading to a subterranean chapel under the temple of Set I.

"We should have never expected what we found," he continued. "Between the doorway and the temple is a complete sanctuary, evidently of the time of the Pyramids, very much ruined but built with huge materials.

"It is rectangular, the inclosure wall is 12 feet thick and consists of two different castings, the outer one of rough limestone and the inner one of large blocks of hard red sandstone. The length of the inside is about 99 feet.
