steamer to keep in commission, and that it would be more economical to sell her the lighthouses and one for the customs, and fisheries.

Mr. Earle replied that Captain Walbran never maintained that the Quadra neither Col. Prior nor himself to recommend the sale of the Quadra and the purchase of two smaller steamers. They always believed that a cheap but substantial boat would be sufficient for a lighthouse tender.

Mr. Templeman pointed out that if they could impress upon the government that two efficient boats could be kept in commission for the cost of one, their -point was gained. President Ker remarked that Captain

Walbran had told him that the Quadra was in every way a suitable boat, and that a smaller boat often could not go out into stormy waters. He believed two boats were fequired. The matter should be attended to at once so that the fisheries might receive ample attention next season.

Mr. H. C. Macaulay stated that it was rumored that the late government were about to purchase the steamer Thistle from the Dunsmuirs for the inghthouse service. Mr. Templeman then moved and Mr.

Futcher seconded the following resolution: "Whereas United States schooners are

employed in fishing in Canadian waters and took during the past season at least two million pounds of halibut, besides destroying a large number of immature fish; and whereas our fishermen in exporting a similar quantity of halibut to the United States had to pay duty to the amount of \$10,000; and whereas it has been brought to public notice through the medium of the press and other sources that smuggling of merchandise continues on a large scale by foreign vessels in British Columbia waters:

east and elsewhere to run the canner-Mr. Earle-The canneries only employ men for about two months in the year: all were unanimous in the opinion that | what would white men do the balance of the year? Mr. Ker-We will have to develop our

deep sea fisheries, thus giving employment nearly all the year round. Mr. Templeman wanted to know if Chinamen were employed on the Colum-

bia river or Alaskan canneries. Mr. Earle-I can only speak for one cannery in Alaska in which I am interested. Chinamen are employed there.

I believe that there are none of us but what would like to see Chinamen excluded but if that is done the canneries are sure to suffer.

The matter was then allowed to drop, nothing definite being done.

The old reliable question of the removal of the San Pedro completed the list. After the members had expressed their opinion as to why this eyesore had not been removed, Mr. Earle promised to again bring it to the notice of the marine department.

er Tees would leave for Alberni next Friday and suggested that Secretary Elworthy go down and write up the mines. The council authorized the secretary to servation whatever. In the meantime
