ST. JOHN STAR. ST. JOHN, N. B., MAY 27, 1901.

A CIVIC OPPORTUNITY. The opportunity which the city now has to secure exclusive control of the business of electric lighting in Carleton is one that should not be carelessly thrown aside.

There is here also a chance to test the value of municipal ownership of a public utility. Whatever profit there would be in the business would be gained by the city.

COLONIAL NAVAL RESERVE. The formation of a colonial naval reserve in Newfoundland has proved very successful in the initial experiment.

A GOOD ASSET. In Ontario it is more fully appreciated than in this province that the waters which attract anglers are a good asset and a source of wealth to be preserved and developed.

There are to be no Sunday excursions out of Toronto this year. Some members of the Trades and Labor Council protested against it at a recent meeting.

It should be quite certain that sober local men cannot get before a contractor brings in Italian or other foreign laborers.

OUTING DAYS. JEWS AND BIBLE. Address Delivered in This City on Saturday at the Synagogue.

Many of your subjects to death because they have offended your majesty. 'This is not true,' said the king, 'but since you have displayed so much faith in my good sense and loyalty to the person, I appoint you to the position of prime minister. But now, can you give me a satisfactory answer to my questions?'

My friends, this is the feast of the giving of the law. The Jews of this city will not forget that the law was given on this day. The Jews of this city will not forget that the law was given on this day.

But not these Jews I assure you will today surpass their more fortunate contemporaries in their rejoicings with this old heritage of their fathers.

There is a popular saying that the truth is stranger than fiction, and there is no old saying so corroborated as this statement. A certain Indian 'noble' made up his mind to learn the language of birds.

There are to be no Sunday excursions out of Toronto this year. Some members of the Trades and Labor Council protested against it at a recent meeting.

It should be quite certain that sober local men cannot get before a contractor brings in Italian or other foreign laborers.

Apply to CHAPMAN & TILLEY, Barristers, 115 Prince Street, St. John. race who settled on an area which on the whole is as temperate as that of Europe, and yet that race in five hundred years behind the other nations in material and industrial achievements. I say, therefore, their climate and soil, great as their influence may be, are not responsible for the great evolution of the European nations, but the word of God, which thousands of years ago was engraved on the tablets of stone for the guidance of mankind, is the real cause of that evolution. Some people are in the habit of dividing the human family into fair and dark races. Such division, however, is only skin deep. Just have a good look at the world, and you will find a goodly lot of fair races and on the other hand a fair number of dark, and, looking again at their stature, thus, the Italians are short, the French are slim, the Russians are stout, etc., but even this division, true as it is, signifies very little, for many times have I seen a swelled head and narrow mind perched on the shoulders of a big carcase, and on the other hand, small bodies are often the seat of precious souls. I say therefore that the human family can only be divided into two great and sweeping divisions—Bible-believing nations and Bible-rejecting nations. I do not draw that line with a view of entering into the speculation as to who will have a better chance in the kingdom of heaven, the Bible-believing or the Bible-rejecting nations. I will leave that question to those of my colleagues who claim for themselves a monopoly of heaven. What I intend to show by my division is that those nations who thousands of years ago accepted that wonderful book, the Bible, have turned the surface of the earth into a paradise, have mastered the secrets of nature, have bridged the oceans with their steam vessels, and annihilated space and time with their electric wires, while those nations who, thousands of years ago rejected the Bible are today little better than the children of the forest. Let us today thank to the God of Israel as His chief instrument in diffusing law and light among mankind. Bicyclists and all athletes depend on BENTLEY'S Liniment to keep their joints limber and muscles in trim. MARINE MATTERS. Str. Ena sailed Saturday afternoon for the West Indies via Halifax. The Furze line steamer Evangeline arrived at Halifax at 3 o'clock yesterday afternoon, ten days from London. BENEFITS OF ADVERTISING. I would as soon think of doing business without clerks as without advertising.—John Wanamaker. To neglect advertising is like resolving never to travel by steam or communicate by telegraph. It is to close one's eyes to the light and persist upon living in perpetual darkness.—Horace Greeley. MIRAMICHI DRIVES (Frederick Gleason). It is learned that the lumber operators on the Little South West Miramichi are having a hard time with their drives, and with no certainty of being able to bring the lumber out. The water is exceptionally low for this season of the year. There are between 4,000,000 and 5,000,000 feet in the Little South West cut for Richards, Hutchinson and Ritchie. The other Miramichi drives are in or nearly so. KILLED HIS SISTER. TORONTO, May 26.—Thomas Ryan, aged 17, living with his parents in Leonard avenue, was arrested, charged with murdering his sister, Olive, aged 11, this afternoon. He pointed an empty pistol at his sister, who said, 'You can't hit me.' He then placed a cartridge in the weapon and snapped it till the full chamber came round. The ball crashed into the little girl's head, killing her almost instantly.
