

the south and north pole or throne of control, we have the 24 flag signs of mineralogy equalling  $360^\circ$  of everything governed by the spiritual Father in the spiritual realm, everlasting worlds without end, when Christ delivers up His kingdom. Amen. Thus these 24 elders are 15 degrees, or one hour of time signs apart, around the throne of God and the Lamb's heart, No. 6. This is where Stephen, the first Christian martyr, and seventh deacon of Jerusalem, saw them over the completed three-storied temple. When this temple descended from heaven to John he saw it too before he died in banishment. The earth is to be banished also. One editor receiving the chapter on "Settling the War by Revelations of Geometry," returned it with this answer "It is altogether too profound for the average reader, consequently I do not consider it suitable for the ——— paper." Thanks for this frankness.

The scientific crosses for each day of the week hung on the outer 6 signs with the square flags will be best shown by glass spheres with the Sabbath cross only casting a shadow from the centre. If the earth were transparent like the glass we would have no shadows of time. The changes of the moon, sun, etc., would be all. Read the accounts to the children and ask why the person bringing the sheep to the priest was required to place their right hand on its head. Have them place it on the skeleton, No. 7, to illustrate "God seeth me." Dress a doll form in Aaron's priestly garments; place the scientific cross over his breast plate, first in the form of the Union Jack; then connect the rings with two spider web crosses and the sides likewise. These crosses are or should be understood by your Thummin and Timmem stones that were lost from Aaron's vest pocket. The oracles or signs are mechanically consulted by our pattern maker, like Moses to-day. Modern astrology was consulted to get these three diameters of revelation properly connected with the four diameters. In all this astronomy and astrology the triangle and cross, the crown and the crescent are made, all pointing from man's imaged heart centre, where the rock on the tables of his heart cry out in the voice of Ten Commandments, 10 in one unitarian triangle of the mineral family of Moses' tabernacle, and 10 triangles in Solomon's temple. Ten in one is a unitarian idea meaning all by these parallel lines of the fog and dewdrop crossed  $60^\circ$  apart in the snowflake and  $90^\circ$  apart in the water drop, all shortened when the fourth line crosses from the "Covenant of Salt" with still the  $90^\circ$  variation in angle preserved. The cubes on Aaron's shoulder point to the heart of man as the Pleiades seven stars point to the heart of the bull when seen on the shoulder of the bull or "lean ox," "fat ox," or Pleiades yoke of the sky. Then the child should be shown these plain scientific facts about these pattern yokes of the sky, hotels, or other names we find in what some "educated (?) fools" dub as "heathen mythology" and "Chaldee yokes of the sky called astrology." God promised to "provoke Israel by nations that knew not God."

If you cannot find a fair sample of cross stone piece the picture of it over Aaron's heart, so to be sure you give due honor to modern Moses. God's handwriting is on the rocks, as the King of Babylon saw on the walls at the banquet. Sinai, the delta of the Nile, and Moses' broken stones are all triangular like the American mineralogist outline of the seven distinct families of minerals. The Egyptian astronomers also built triangular pyramids.
