

Plate Bending Machines.

Hand Power Bending Rolls.

This machine is of invaluable service to all boiler-makers etc., and is a very complete machine. The rolls are arranged in pyramidal form, are 6 inches in diameter and will bend $\frac{1}{2}$ inch plates 6 feet in length. This machine is of first-class material, workmanship and finish, and will accomplish with ease a vast amount of work.

Power Bending Rolls.

We also manufacture a large variety of power bending rolls, which are of the latest and improved patterns, and of which photo's and descriptions can be had on application.
