

clean with a woolen cloth, which gives the harness a glossy appearance. This preparation does not injure the leather or stitching, but makes it soft and pliable, and obviates the necessity of oiling as often as is necessary by the ordinary method. When the harness is removed from the horse, take a woolen cloth or chamois skin, kept for the purpose, and wipe off the dust and all moisture from rain or perspiration, and when the harness is nearly dry, rub the damper parts very thoroughly with a second cloth or skin, until they are quite soft and pliable.

The bits, and plated mountings, should be cleaned and rubbed with a slightly oiled rag, before the harness is finally hung in its place; the harness should be protected from dust either by a covering of cloth, or by hanging in a closet. Whenever the leather becomes dry and hard, it should be cleaned and oiled according to the foregoing directions.

GREEN SALVE OR FOOT OINTMENT.

FOR WOUNDS, NEW OR OLD.

2 oz. beeswax; 2 oz. honey; 2 oz. resin; 1 pound lard; 2 oz. Burgundy pitch; $\frac{1}{4}$ oz. verdigris. Simmer slow and stir in verdigris. It is one of the best hoof ointments as well.
