

Cash receipts for the year, \$190,772.11. Total cash disbursements, \$176,185.63, leaving a cash balance on hand, April 30th, 1915, of \$109,835.59.

The report of the Secretary F. L. Houghton was equally satisfactory. The progress that has been made during the year is best shown by the following table:

	1915	1914
Cow Registration	45,063	27,750
Bull Registration	25,617	15,000
Cow Transfers	41,117	36,000
Bull Transfers	25,649	20,721
Duplicate Certificates	628	404

Totals 138,590 105,599
The total cash receipts from registrations and transfers was \$175,184.25. Accretions to the line of monthly dues during the year reached a total of 1,336, exceeding the increase in 1914 by 57.
The expenditures of the Literary Committee during the year totaled \$53,636.69, of which the main item, \$17,452.82, was for advertising.

The committee in charge of appropriations for prizes at fairs reported that no definite arrangements had been made. The possibility of foot-and-mouth disease not being completely eliminated and the fair being cancelled, made it advisable in their opinion to defer action. It was their opinion that the money appropriated for their use would not be all expended.

THE HOLSTEINS OF B. E. HAGERMAN
HEN in Windsor reported in Hamilton, Ont., recently, that the Dairy representative dropped in on Mr. R. H. Hagerman. He found Mr. Hagerman more than usually pleased with the record made by his Holstein Famine Kormyba, who went 111 lbs. in one day, 1295 lbs. in seven days as a five-year-old. Mr. Hagerman told us that this great cow had eaten during her best as high as 80 lbs. of hots each day (meals 25 lbs. by way), a mixture of bran, shorts and corn and alfalfa hay. Several of Holstein's stable mates looked good for records equally large, and on one heifer in particular, Mr. Hagerman is expecting it to keep her long enough, to make a regular May Echo record for long distance work. This heifer is closely related in blood lines to May Echo.

This young stock looked particularly growthy and thrifty, and we were rather surprised to learn that the calves did not know the roots of grain. Some of them, six months old, have been fed only alfalfa and alfalfa hay. We were notified that Mr. Hagerman makes large use of alfalfa, which he regards as the principle of all forage for dairy stock generally.

Outside of the Holsteins, the feature of the Hagerman farm that attracted us most was the splendid new metal barn, one of the finest barns that it has ever been our pleasure to inspect. There are two big silos and a large corn crib. Hagerman seems to have the ideal dairy combination—good, good stable stock, which to house them and the cheapest and best of home-grown feeds with which to feed his Holsteins.

NEWCASTLE HERD OF DAIRY SHORTHORNS
3 choice dual purpose Shorthorn Bulls for sale, from 18 to 30 months old. Prices right, quick, breeding right. Now is your chance to buy right.
A. COLWILL
NEWCASTLE, ONT.

Highland View Dairy, Amherst, N. S.

Another Winner That "Came Back" at Ormstown.

Orn's Favorite Pouch was sold to the butcher for beef. Nell Bangster recognized him shortly, rescued him from slaughter, and won first in his class with him at Ormstown Spring Show a year ago. A week ago, at Ormstown, this sire won the grand championship as best male of his breed. How many like him are annually sacrificed to the butcher?

PRINCE EDWARD ISLAND

KINGS CO., P. E. I.
MONTAGUE, May 28.—Since my last writing we have had a lot of wet and weather, cold north winds every day, seeding is very much delayed. May 27, we had very cold storm, snow and rain. There is a splendid catch of clover this year if we can get some good seed to make it grow. Grass is very backward. There is no potash this year, and it will be badly missed for potatoes and grain. A large quantity of balo leaf will be used. Feed is getting scarce; hay is selling from \$12 to \$16 a ton. It will be a good while yet before the cattle can do out on the grass. Eggs are holding at \$10 per pair, \$100 head to live weight. A. A.

WELLINGTON CO., ONT.

FERRIS, May 28.—Seedling operations in month brought along and splendid, so that everything is well advanced this season. The yearling, though the weather the past week has been very hot, these again are getting in mangels and corn. The price of eggs is now \$9; hens have dropped a cent, but eggs, potatoes, so plentiful there is no sale for them.—W. B.
GUTHRIE, May 28.—Seedling operations are about finished, except for late potatoes, turnips and rape. Fall wheat and corn are doing well. Spring crops are somewhat backward, especially those on old soils, on account of the recent cold weather and a few hard frosts. Fruit blossoms, however, have not been injured to any great extent, except strawberries, which are considerably damaged in growing places. The hay crop will probably be rather light, but a large acreage of turnips has been planted in an excellent seed bed.—C. S. N.

STANTONS CO., ONT.

TURRIFF, May 28.—Spring commenced early and a great deal of seed was early, but the weather has made growth backward to late. There has been an increased acreage sown, although the crop failure of last year made it difficult to get seed again, for which a great deal of money was sent out. Pasture quality were scarce and the crop will be small. Fall grain is looking well, especially rye. Strawberries are running again. There will be little live stock for sale this fall. The herds are small and there are few buyers to buy that to sell. In view of a promising season for hay and grain.—W. H.

ALGOMA DIST., ONT.

BATLIEUX MAIRIE, May 28.—We have not had so cool weather during May than we had in April this year, but crops are looking fine. Potatoes are about all in the ground and are getting next. A good many of the farmers are taking advantage of cheaper labor to build new barns and some more land. Under training is also getting popular.—H. K.

SASKATCHEWAN DIST., SASK.

BLUCHER, May 28.—Seedling practically all completed and in very good shape. We are having nice spring rains at present. Butter, 50c; eggs, 30c; dressed hogs, 25c; corn, \$1.10 per cwt.; milk cows, \$8 and 10; oats, 55c; horses, \$140. In the north grain is looking fine at present.—W. H.
