THE CREAM SEPARATOR QUESTION IN A NUTSHELL.

ALL GOOD CREAM SEPARATORS employ centrifugal force in separating the cream from the milk, the bowl being made to revolve in the neighborhood of 7,000 times per minute. This main feature is common to all. There are a number of other features of more or less importance. Some makes have a little advantage here and others there, but if the machines are well constructed and of good design they will do the work and render satisfactory service.

In our Windsor Separator only the very best grades of Bessemer steel, properly tempered and hardened, and the best Swedish iron are employed. No one can get better materials than these. The bowl revolves at the same speed as in the high-priced machines, and in the minor features the Windsor has advantages over most if not all the others. It is as good a separator as it is possible to produce at any price, and we gladly send it out for a week on FREE TRIAL. Our prices run from 25% to 40% below what others charge. For our smallest size, capacity 115 lbs. milk per hour, we charge \$38.50; for the next size, capacity 210 lbs. milk per hour, our price is \$48.75; etc. Descriptive printed matter sent on application.

WINDSOR SUPPLY COMPANY, Windsor, Ont.

WHY PLANT HARDY ORNAMENTAL SHRUBS?

OUR SPECIAL OFFER.

1 Lilac Josikea; 1 Deutzia Crenata;
1 Honeysuckle Tartarica Rubra;
1 Philadelphus Grandiflorus; 1
Spiraea Thunbergia.

Collection of Hardy Shrubs, as above, one plant of each variety, sent postpaid, on receipt of

50 CENTS.

BECAUSE nothing is more satisfactory because they increase in size and beauty from year to year. Because they impart a picturesque appearance. Because they possess a decorative value never equalled by trees. Because the taller varieties may be trimmed so as to afford ample shade. Because they add a home-like touch not obtainable otherwise.

See our catalogue, which contains a splendid list of varieties. Some extra large shrubs offered this year. Catalogue free on application.
