e Financial Policies of the Nation ist-Conservative Government.

The business firm which would un ertak durin times of depression ad financial stringency to extend its ises, increase the number of its double its running exes, borrow huge sums of money at bigh ra as of interest, and then call upon its shareholders for contributions to make up the resultant de cits between income and spendings would go to ruin unless new directors vere appointed and a different policy nitiated, say the Canadian Liberal

The railroad company which in imilar conditions extended its lines into unproductive territory, which increased its rolling stock when no in crease was necessary, which replaced good enough stations with fancy new buildings at enormous cost, and which then undertook to raise its rates in order to make earnings talize expenditures would soon be in the hands of the receiver.

The farmer, who during a period of poor crops and low prices, went head and purchased expensive and useless implements, who tore down his good enough barns and hull new and larger one at high cost, who built expensive fences for stock that he did not possess, and who then mortgaged all these and his land besides to get the money to do these foolish things, would soon find himself in the hands of the sheriff or staggering along under a load of debt that he could never hope to escape.

The salaried man who became extravagant and bought cars and costly furniture, moved into a new big bouse with expensive servants, and lived at the rate of \$8,000 a year when his salary of \$5,000 was more likely to be reduced than increased, would not have to wait very long for the day of reckoning.

The above, it may be said, are quite suppositious cases to be quoting at a time when economy, efficiency, and retrenchment have become the watchwords of business men and in dividuals the whole world over. It would be hard to find such cases in the business world at the present

But is it, not an actual and undeni able fact that they but fairly illustrate the amazing lack of the first principles of business and the incredible blindness with which the country is being overloaded with a staggerin burden of debt by the present Government of Canada?

The Government of Canada is the board of directors of the greatest business in Canada—the Dominion itself-and the shareholders are the people themselves who by their hallots elect that Government to office.

It is the people themselves who di rectly or indirectly, immediately or at some time later on, must supply every dollar of the money which the board of directors administers and

ELECTION POSSIBILITIES.

Borden Government May Go to the L'eople at Any Moment.

The British North America Act provides clearly that Parliament shall last for five years from the return of the last previous election writs, unless Parliament is previously dissolved. The last writs for the general election of 1911, when voting took place on September 21st, were offi-cially returned on October 7th, 1911. The present Parliament, therefore, would come to an end by law on Oc-BROUGHT UP IN POTTERIES tober 7th, 1916; but there is a prowision in the law allowing two full months for the holding of an election. It is therefore quite clear that an election need not necessarily take place before December 7th, 1916.

When attempts were made to bring about an election, first in November, MAN of many parts is Sir 1914, and again in June, 1915, Oliver Lodge, who has been was found that theer were certain legal difficulties in the way, probably the most important being the fact Central Committee which that there were not and could not be will assist Lord Figher, legal voters' lists in certain parts of Manitoba and the unorganized districts of New Ontario. Brussels and Ghent have been destroyed, and Mr. Grev thinks the German intention is that the raiding headquarters for Zeppelins shall in the future be established at Liege or some point in Germany. Thence they will fly to Antwerp, where they will descend to renew their petrol supply and take up bombs for raids on England. In this way, too, they would have a better chance or evad-

Mr. Lawson says that prior to the war there were three Schuette-Lans dirigibles in commission for the German Government, and several larger airships of an improved type have been constructed since the war began. Mr. Lawson is a representative in this country of the Schuette-Lans Airship Company.
