onies. A small colony of bees is much

less vindictive than a full colony and

thus offers a better opportunity for the beginner to grow with his bees.

1. A veil of black cotton tulle.

4. A spur wheel wire embedder. 5. An uncapping knife.

7. A complete set of Department literature, Bulletins 213, 233 and 256, and a good reference bee book.
8. A small honey extractor.
With the exception of Nos. 6 and 8 it is advisable to acquire the ma-

terial needed from a supply firm at

probably co-operate with another beekeeper in securing the use of an ex-tractor. With the increase of col-onies to ten, it would then be advis-

able to provide a storage can to assist in handling the crop.—W. A. Weir,

To Prevent Swarming of Bees.

Be sure to give supers enough to avoid any crowding which may cause the bees to become discouraged, quit-

work and swarm excessively. It

should be the beekeeper's aim to pre-

vent swarming as much as possible.

This is done by keeping young

queens, giving plenty of room and a systematic examination of brood-

chambers to detect colonies which

are preparing to swarm. When queen cells are found far advanced they

should all be destroyed and the queen

herself removed. After the colony

has been queenless one week the combs should again be examined and

all cells except one removed. This one will provide them with a queen

and if only one is left they will not

swarm again. Where an improvement of stock is desired the new queen may be given instead of leaving one

queen cell.

Natural swarms should be hived

on the old stand after removing the

parent colony to one side. The swarms should be given the supers

from the old colony. New swarms work with great vigor because they

have no brood to care for during the first week. Colonies held together

without swarming gather more honey

than those which swarm. It is the beekeeper's patriotic duty to reduce

the cost of honey production and thus

increase the quantity he is called to produce as greatly as possible. They

also cause the beekeeper less trouble

at unexpected times. This may be

## as the Best-How to Prevent Wash poisons and toxins from system before putting food into stomach.

Wash yourself on the inside be-fore breakfast like you do on the outside. This is vastly more important because the skin pores do not beginners. Start with three absorb impurities in to the blood, causing illness, wille the bowel date equipment and then make the pores do.

bees pay their way. One colony does For every ounce of food taken into the stomach, nearly an ounce of waste material must be carried ably. Three colonies can be managed out of the body. If this waste is not eliminated day by day it quickly ferments and generates poisons Avoid many troublesome pitfalls gases and toxins which are absorbed or sucked into the blood stream. by starting with the right hive. The through the lymph ducts which 10-frame Langstroth hive has given the best satisfaction in Ontario. All A splendid health measure is to

beekeepers' supply houses carry this drink, before breakfast each day, a hive and its parts in their regular glass of hot water with a teaspoonstock. Buy your first hives from a ful of limestone phosphate in sood manufacturer. It is very neces-sary to have all hive parts inter-these poisons from the stomach, changeable so that they may be used liver, kidneys and bowels, thus in any colony in the apiary. Uniformity and accurate workmanship alone cleansing, sweetening and freshening the alimentary canal before eat can ensure this need.
One complete 10 fr. Langstroth hive consists of: ing more food.

A quarter pound of limeston phosphate costs but very little at the drug store, but is sufficient to 2. A hive-body with self spacing make anyone an enthusiast on in side bathing.

#### provide for each colony one queen ex- CONVALESCING FROM

INFLUENZA The bracing atmosphere foud i Algonquin Park is just what is need for the future combs. All hive material should be nailed, wired and painted before the opening of the enza or those who are in need of a enza or those who are in need of a rest and recuperation. The Highland It is advisable to commence with a 2-lb. package of bees and queen; a swarm or a nucleus. Less danger from disease attends the buying of pound packages than the buying of swarms and nuclei. Pound packages may he secured for delivery from May 1st to June 30th. Early packages will yield a surplus if carefully ttion, Ont.

BACKACHE, LUMBAGO, RHEUMMATISM, STOMACH AND LIVER TROUBLES, ACNE. SKIN DIS-EASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS. The knowledge gained from many years' experience in treating diseases just like yours is of much benefit to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well—that he is rid of his ailment—he feels that a heavy load has been lifted from his shoulders, I give every patient the benefit of the knowledge acquired through the long experience of a graduated, licensed and registered specialist, in order to bring about the most satisfactory results in the shortest possible time.

NERVE EXHAUSTION CONDITION AFFECTING MANY MEN-THE GREAT AM-ERICAN DISEASE - IT IS BROUGHT ON BY OUR MAN-NER OF LIVING-OUR WORRY AND HURRY - AMERI-CANS EXHAUST MORE NERVOUS ENERGY THAN ANY OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right-why they can't work like they used to-why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Mer. affected with nervous exhausion have no endurance-no ambition everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable—they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights fol-

RHEUMATIC AILMENTS

SCIATICA AND OTHER FORMS OF RHEUMA'TISM, LUMBA-GO, PAINS IN BACK, SWELLING, ACHING, PAINFUL CONDITIONS IN ANY PART OF THE BODY-INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS - MANY

Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheu matic patients are nearly all strong and robust before being attached by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy bur den has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.
