A large number of the industries claimed to have been brought into existence by the N. P. turn out to be establishments which have been removed from one town to another, owing to increased railway facilities. In fact some of the "new industries" are said to exist only in the mind of the Finance Minister. The exedus to the States during the past three years has been over ten times the number that even the "padded" list claims for home trade. The Tories seem forgetful of the fact that new manufactories were started before the N. P. was dreamt of.
